SVIJET » "Svijet u kandžama pohlepe"

Autor je napisao više od 300 knjiga, prevedenih na 73 jezika na teme iz politike, religije i nauke.

"Svijet u kandžama pohlepe"

U današnje vrijeme većina svjetske populacije se žali na siromaštvo. Sistematski ih uvjeravaju da finansijske poteškoće s kojima se suočavaju nastaju kao posljedica pekornje populacije koja je peopteretila "ograničene" prirodne resurse. To što milioni umiru od gladi širom svijeta više nije udarna vijest. Takvi izvještaji više nisu predmet dnevnih novosti.

Poplava "vrhunskih izvještaja" u kojima se žali zbog ubrzanog trošenja svjetskih resursa je ljude učinila indiferentnim na stanje ostalih. Smatraju prihvatljivim izvještaje o ljudima koji umiru od gladi u različitim dijelovima svijeta jer je to prirodna posljedica scenarija koji se promovira ovim "vrhunskim istraživanjima".

Istina je da je naša planeta ostarila i da je ljudska populacija mnogostruko uvećana, ali je jako malo nas svjesno činjenice da su trenutni svjetski resursi dovoljni za potrebe duplo većeg broja ljudi. Pa čemu onda ovolika galama? Zašto se sve veći broj ljudi primorava da žive ispod linije siromaštva svake godine? Zašto je veći dio ljudske populacije onemogućen da koristi prirodne resurse?

Nije problem nedostatak sredstava ili njihovo trošenje. Veoma dobro koordiniran "lobi siromaštva" je već dugo u funkciji. Razlog zašto ljudi postaju siromašniji i bez pristupa resursima nije nedostatak tih resursa, nego lobi siromaštva koji funkcioniše već jako dugo, a kojem je cilj da kontroliše sve prirodne resurse širom svijeta. Taj lobi širi propagandu sistematski kako bi obmanuo ljude i zadržao svoj monopol nad svjetskim resursima.

U današnje vrijeme većina svjetske populacije se žali na siromaštvo. Sistematski ih uvjeravaju da finansijske poteškoće s kojima se suočavaju nastaju kao posljedica pekornje populacije koja je peopteretila "ograničene" prirodne resurse. To što milioni umiru od gladi širom svijeta više nije udarna vijest. Takvi izvještaji više nisu predmet dnevnih novosti.

Poplava "vrhunskih izvještaja" u kojima se žali zbog ubrzanog trošenja svjetskih resursa je ljude učinila indiferentnim na stanje ostalih. Smatraju prihvatljivim izvještaje o ljudima koji umiru od gladi u različitim dijelovima svijeta jer je to prirodna posljedica scenarija koji se promovira ovim "vrhunskim istraživanjima".

Istina je da je naša planeta ostarila i da je ljudska populacija mnogostruko uvećana, ali je jako malo nas svjesno činjenice da su trenutni svjetski resursi dovoljni za potrebe duplo većeg broja ljudi. Pa čemu onda ovolika galama? Zašto se sve veći broj ljudi primorava da žive ispod linije siromaštva svake godine? Zašto je veći dio ljudske populacije onemogućen da koristi prirodne resurse?

Nije problem nedostatak sredstava ili njihovo trošenje. Veoma dobro koordiniran "lobi siromaštva" je već dugo u funkciji. Razlog zašto ljudi postaju siromašniji i bez pristupa resursima nije nedostatak tih resursa, nego lobi siromaštva koji funkcionira već jako dugo, a kojem je cilj da kontroliše sve prirodne resurse širom svijeta. Taj lobi širi propagandu sistematski kako bi obmanuo ljude i zadržao svoj monopol nad svjetskim resursima. Dozvolite mi da pojasnim ovaj svoj stav kroz statistiku, radi boljeg razumijevanja.

Prema posljednjim izvještajima OXFAM-a, međunarodnog građanskog udruženja koje djeluje u okviru Oxford Univerziteta u Engleskoj, 85 ljudi na svijetu su bogatiji od 3,5 milijarde ljudi, dakle polovine ljudske populacije. Bruto nacionalni proizvod 48 najsiromašnijih država na svijetu je manji od cjelokupnog bogatstva tri najbogatija čovjeka na svijetu. Drugim riječima, stanovništvo 48 država bi moglo uživati ekonomsko blagostanje uz bogatstvo koje posjeduju samo 3 čovjeka.

Prema procjenama, 6 milijardi dolara je potrebno da se educira sva populacija svijeta, a 13 milijardi bi bilo dovoljno da se zadovolje osnovne potrebe za hranom. Dok se te cifre nalaze pred očima svijeta, 12 milijardi dolara se troši na kupovinu parfema u Evropi svake godine, 17 milijardi dolara na hranu za pse i mačke u Evropi i Americi, a više od 50 milijardi dolara na rješavanje problema gojaznosti u SAD-u. Samo u SAD-u se troši 640 milijardi dolara na vojnu opremu.

Ove cifre jasno upućuju da ne postoji organski uzrok siromaštva u svijetu. Naravno da ljudi mogu trošiti novac na kupovinu parfema i hrane za pse, ali nema potrebe da drugi ljudi umiru od gladi u tom istom trenutku. Svijet posjeduje dovoljno za svijet.

Međutim, organizirani lobi siromaštva to ne želi dozvoliti. Eksploatatorski sistem kojim se ljudi i države osiromašuju je u punom pogonu. Ratovi su jedan od glavnih izvora prihoda za ovaj lobi. Tokom posljednjih 10 godina civilna proizvodnja u SAD-u se smanjila za 19%, dok je vojna proizvodnja doživjela ogroman porast od 123%. Još jedan element u istoj analizi govori da je industrija vojne opreme tri puta veća od svih ostalih industrija.

1 % populacije kontroliše 99% materijalnih resursa. Dakle, svjetski resursi kruže isključivo među ovih 1%, pa dok se to odvija, ljudi postaju sve siromašniji i umiru od gladi, a UN smanjuje rezerve hrane za izbjeglice, govoreći: "Nemamo dovoljno."

Dok se sprovodi osiromašavanje ljudi, također postoje i države koje moraju biti osiromašene. Najvažnija karakteristika ovih država su njihovi prirodni resursi. Afganistan - čijeg 36% stanovništva živi u apsolutnom siromaštvu i koji je primoran prisiliti hiljade djece na rad, Irak - poprište najgorih pokolja na Bliskom istoku, Mijanmar - koji se suočava s genocidom, kao i cijeli afrički kontinent, orobljeni su ratovima i nestašicama, uprkos svojim bogatim resursima. Afrika još uvijek mora poštivati monopol bivših kolonijalnih sila, jer, iako raspolaže bogatstvom poput uranijuma, nafte, dijamanata ili prirodnog gasa, nije joj dopušteno da ima industriju koja će koristiti sve ovo, niti transportnu mrežu da ih alokira. Države sa industrijskom i transportnom moći koriste ove resurse za svoje interese, a ne za korist države vlasnice. Nije čudno da ratovi i glad uvijek zahvataju baš ove države.

Globalne aktivnosti lobija siromaštva također muče i razvijene zemlje. Broj beskućnika u Francuskoj je porastao za 50%, s obzirom da 3,6 miliona ljudi nema trajno prebivalište. Glad je ogroman problem na sporednim ulicama Londona, dok je broj djece bez doma u SAD-u dosegao 2,5 miliona.

Živimo u jedinstveno vrijeme najstrašnijih tragedija, kada je mržnja veoma jaka, a ljudske vrijednosti zaboravljene. Kako se kraj svijeta približava, konstantno ćemo

svjedočiti borbi između dobra i lošeg. Ono loše će biti zaista zlo, dok će rad za dobro u ovoj najtežoj borbi biti neizmjerljivo vrijedan.

Islam opisuje veličanstveno pravedan sistem koji će okončati ekonomske nepravde, ukloniti ponor između bogatih i siromašnih, te mehanizme iskorištavanja i sve vrste nepravde. Muslimani imaju snage da implementiraju ovaj pravedni sistem i da time spase svijet. Međutim, da bi to postigli, moraju se ujediniti. Kako bi uspostavili uniju, moraju imati želju da iskorijene nepravdu i da oslobode nezaštićene. Očigledno je da sistem koji teži ostvarenju isključivo vlastitih interesa nameće nevolje i šteti muslimanima također, jednako kao i ostatku svijeta.

Muslimani bi trebali odbiti biti dijelom takvog eksploatatorskog sistema i imati na umu isključivo vlastitu udobnost. Trebalo bi da se ponašaju kao spasioци svih ljudi. Trebalo bi da se srame mentaliteta koji podpada pod eksploatatorski sistem, koji vodi računa isključivo o vlastitim interesima i pasivno posmatra, govoreći: "Dobro je dok sam ja dobro." Njihova je odgovornost da reaguju na ovu nejednakost i lobi siromaštva, te da promovišu i jačaju pravedan sistem koji je predviđen islamom. Oni mogu razviti rješenje koje će neutralizirati ovaj užasan sistem pod kojim ljudi jecaju u krvavim suzama i još uvijek trpe iskorištavanje.

Najprije, međutim, moraju se sjetiti da su na ovom svijetu da bi bili testirani, a ne da se odmaraju. Muslimani imaju odgovornost prema svim potlačenim ljudima (Kur'an, 4/75). Allah će uvijek pomoći onima koji se zajedno trude da budu na pravom putu.

OPINION

World in the clutches of have-mores

85 individuals in the world are wealthier than 3.5 billion people, in other words half the world's population. The GNP of the world's 86 poorest countries is less than the total wealth of the world's three richest people.

Hasan Yalqin

In today's world, a vast majority of the world population complains of impoverishment. They are being systematically made to believe that the financial assets they are being used with is mostly due to the rise in population, which is overloading the "limited" natural resources. Following this line of reasoning, the world is no longer a breeding area. Such reports are full to make it to daily news bulletins.

The slogan of "well-constructed" reports concerning the world's population has made people in different parts of the world as a natural consequence of the reports promoted through these "well-constructed" reports.

It is true that our planet has grown old and the human population has increased manifold but few people are aware of the fact that the current world resources would suffice the needs of twice the current human population, in what is the real world? Why a large number of people is being pushed before the poverty line each year? Why a major chunk of human population is unable to access natural resources?

It is not a matter of a lack of resources or their depletion. A very well-constructed "poverty lobby" has been long at work. The reason why people are becoming impoverished and unable to access resources is not the lack of those resources, but a poverty lobby that has for long been at work, which wants to take control of all natural resources around the world. This lobby has been operating through creation, systematically to restrict people so as to maintain an unceasing world's resource. It has not clearly set paths through nature for a better environment.

According to the latest report from OXFORD, an international civil society active under the auspices of Oxford University in England, 85 individuals in the world are wealthier than 3.5 billion people, in other words half the world's population. The GNP of the world's 86 poorest countries is less than the total wealth of the world's three richest people. To put it in another way, the population of 48 countries could enjoy economic growth with the wealth possessed by just three people.

As per estimates, \$1 billion is needed to educate the population of the world and \$10 billion to provide basic healthcare. While those figures are before every eye, \$10 billion is spent on the purchase of perfume in Europe every year, \$10 billion is lost in the stock market in America and more than \$10 billion on weight loss solutions in the US. \$648 billion is spent on military equipment in the USA alone.

Figure shows that there is no organic reason for poverty in the world. Of course, people can spend money on perfume or drug, but there is no need for other people to be sick, hungry or want in the process. The world has plenty for everyone.

However, no report and poverty lobby wishes to allow it. An exploitative system in which people had conducted no high impoverished has been set in motion. There are some of the main reasons of this lobby, being the set in motion, which has been reducing 15 percent of the military budget in the same analysis as that military equipment are three times greater than other sectors.

One percent of the world's wealth is in natural terms. The world's

resources are being increasingly impoverished and no drop of tragic and the 150 crore of food required to support the world's population.

The global activity on the part of the poverty lobby is also troubling developed countries. The number of homeless people in France has risen by 50 percent, with 5.6 million hungry and food

shortage. Hunger is a huge problem on the back streets of London, while the number of homeless children in the US is reported to have reached 2.5 million.

We see an accumulation of the most horrifying tragedies, when hunger is very poor and human values have not allowed to flourish. As the old saying goes, we will see a constant struggle between the good and the bad. The bad will win only when the good is not strong enough.

It is not a matter of a lack of resources or their depletion. A very well-constructed "poverty lobby" has been long at work. The reason why people are becoming impoverished and unable to access resources is not the lack of those resources, but a poverty lobby that has for long been at work, which wants to take control of all natural resources around the world.

No room for sentiments

THE Grand Mufti of Saudi Arabia, Sheikh Abdul Aziz Al-Jabir, urged a group of preachers that called on him at the office of the Ministry of Islamic Affairs to avoid religious in politics and maintain their stance from religious preaching.

It is one of those rare instances in which a key religious authority issued a warning to people who expressed too much enthusiasm to change the world around them and are too much willing to get involved in major events unfolding around them and to see some of those events via their own eyes.

We have mentioned that people who expressed too much enthusiasm to change the world around them and are too much willing to get involved in major events unfolding around them and to see some of those events via their own eyes.

The Mufti Al-Jabir, a researcher in Islamic affairs and that good intentions are on religious to the science of Shariah law. The same applies to politics, an environment cannot set, as a guide when it comes to international relations.

The Mufti Al-Jabir, a researcher in Islamic affairs and that good intentions are on religious to the science of Shariah law. The same applies to politics, an environment cannot set, as a guide when it comes to international relations.

today is directed toward traditional Islamism, the truth is actually elsewhere — the breadth of Islamic thought has regressed toward the medieval Islamic school.

Madh like the Madh Islamic revival movement, Islamism was born during the era of recent activities — similar to communism — and a later became mixed with political aspirations, like Stalinism and Marxism. What we see today is nothing more than a premature reversion of a confused society in which there are no Islamic convictions and political Deobandist convictions.

Such an being exploited by political regimes in the region.

The high rate of crime being committed in the name of Islam in different parts of the world — and which has no precedent — has got a through the worst state of degradation in Muslim history.

While the chaos, the very of entire societies being hijacked has its justification in the name of Islam, it is in fact a modernist movement, the trend is sweeping its normal to wonder when a woman's firm in the Saudi city of Jeddah says it "wants to attract 100,000 girls".

The number is, of course, exaggerated, but the idea itself of those circumstances is worrying. Who is to be blamed for those who have hijacked the name of Islam to get out of control? The program of this form is very general, with topics such as humanism and social affairs on the table, but the idea of changing the concept of school and neighborhoods to separate within the concept of change and collectivism is worrisome.

In Pakistan and India, the religious movement Takfiri Jamaat, which says it is dedicated to socialism, is an active group whom many — including Saudi scholars — criticized and repudiated. Although it does not call on justice or light, but its overall style of functioning makes them no easy target to be restricted by external groups.

Unity among Iraqis

This is with reference to the report "Anti-IS coalition makes major Iraqi Army" (Feb. 20). In order to effectively fight the well-armed Islamic State (IS), it is very important for all Iraqis to set aside their sectarian differences and join in the efforts to root out the evil from their country, which if left unchecked might lead to the dismemberment of Iraq.

As per media reports,iktan is supporting the Shiite groups in Iraq and trying to support the country's Shiite population with the aim of gaining a stronghold in the Iraqi Arab world. The failure of Iraq should give priority to the interest of their own country and should not fall prey to the Iranian sectarian agenda.

The sectarian divide in Iraq will only work in favor of the IS and its allies. An anti-sectarian Iraq is already in place, if the trend of dividing Iraq along sectarian or ethnic lines continues, there will be nothing left to prevent it to try to the Iraqis to defend their country from foreign powers based on destroying them. It is a known fact that Iraq remains huge natural resources but a divided Iraq can never effectively reap the fruits of this immense natural wealth.

The Iraqi Army could play a critical role in fighting today among the Iraqis and could easily emerge as the sole unifying factor. Unity among Iraqis is a must if effectively counter the IS threat.

Rabesha Qazi Jeddah

War on terror

We appreciate US President Barack Obama over the statements clarifying to the world's Muslims that the War is not a war with Islam. We respect his sentiments and kindly oppose terrorism who are trying to promote an agenda to ward off War. Actually, it is not the war on terrorism that has created an impression about Islam being a war with Islam and Muslims, it is the wrong policy of the various western powers and the negative and biased media coverage of the Islamic world that are responsible for this very perception.

We cannot forget the Obama's predecessor made a cowardly reference to the aftermath of the 9/11. Secondly, it was not a Muslim who proposed the theory of a clash of civilizations, it is the product of a western brain.
