

# Neanderthals: A Human Race

The Neanderthals emerged suddenly in Europe around 300,000 years ago, and disappeared, or else were assimilated by mixing with other human races, silently and just as quickly about 35,000 years ago. The only difference between them and present-day humans is that their skeletons are rather sturdier and their brain volumes slightly larger. Neanderthals were a well-built human race, as is now agreed by just about everyone.

A fossil belonging to a Neanderthal

Detailed comparisons of Neanderthal skeletal remains with those of modern humans have shown that there is nothing in Neanderthal anatomy that conclusively indicates locomotor, manipulative, intellectual, or linguistic abilities inferior to those of modern humans.[72](#)

Therefore, many modern researchers describe Neanderthal Man as a sub-group of modern man and refer to him as *Homo sapiens neanderthalensis*. Recent discoveries show that the Neanderthals buried their dead, made various musical instruments and shared a culture as developed as that of modern man, *Homo sapiens sapiens*.

Although the fossil findings show that Neanderthal Man was a human, with nothing primitive about him compared to ourselves, evolutionists still portray Neanderthals as ape-men. This is just one of the many indications that Darwinism is based not on scientific
