

Besh Ko'z, Bir Miya

Life in the US after the presidential election

Impression #1 — Whatever passport or culture may be, we will all see the end of the 2016 United States presidential campaign. Enough already. I don't know how the election is flying through my mind. None of the ideas are easy to classify. They do, however, offer a common denominator. They are all reminding me that our behavior is near. One way or the other, it'll be over in a matter of hours.

Impression #2 — The past 18 months have not been a particularly enjoyable time for Americans

living abroad. This impression is obviously both personal and complicated. In over 30 years of life in Taiwan, I have never felt so far from my homeland, or so sad about it.

I had thought my earlier experience of low emotion over the decision of George Bush to lead the United States and its allies into war in Iraq would never be equalled. You do remember all the "talk about this or that" and "unsuitability of the Republican nominee and the fractured credibility of the Democratic rival" have shown us how inept the process of candidate selection really was this time around. Let's not only talk of the Grand Old Party and how it failed us, The Democrats should have seen the Clinton fallout

coming from a long way off.

Impression #3 — An enormous increase of goodwill and civility followed in the campaign, and the precious commodity of time, will be essential if the country is to make a new beginning after Nov. 8.

And that is no option. We absolutely need new beginnings. Given the scar tissue the election is leaving in its wake, the "war" between Trump and Clinton, across the board, between Republicans and Democrats, has been as devastating to the country as anything we've witnessed since the Nixon years. The terrorist attacks of 9/11, and terrorist-related suffering that followed largely united the American people and hardened our resolve. We fought evil

as one, undivided, and hopeful nation.

At the moment, we are a people hurting and divided. We are struggling to cope.

Whoever wins in the coming 48 hours, and it will probably be Hillary Clinton, will have a trophy cracked and badly tarnished. This campaign has been a messy, smelly, down on all fours wrestling match. Not only has it exhausted and nearly demoralized the electorate, it has come very close to sullying the office of the American presidency.

Impression #4 — We need reconciliation between the two sides badly, and it is not clear how that can come about.

Only a handshake of gargantuan proportions, I believe, can invali-

diate the previous sentence. The results of the electoral vote may be clear, and that will help, but a popular vote of 45 percent or so for the losing ticket will make national reconciliation all the harder. No one expects a popular landslide for either candidate to happen.

We have no time to waste. Confronting problems in healthcare, the economy, racial and religious tensions, and crises in a slow of humanitarian and international hot spots requires time that the new president will not easily find.

Impression #5 — The adjective may alternate some, but as a nation we are in genuine need of spiritual healing after Nov. 8.

Healing can come beyond the limits of organized faith and religion, and often does. We need

not identify ourselves as Muslim, Jewish, Christian or anything else to avail ourselves of the potential to be healed from within our frail humanity. Belief in a higher power should light in a time of darkness may encourage many of us. It does not. Let others seek solace elsewhere.

For healing to come, we must admit we are broken, and need help. I still believe things will pan out all right after Nov. 8. Battles do end, and soldiers do lay down their arms.

This is the time for all Americans to do just that.

Father Daniel J. Bauer SVD is a priest and associate professor in the English Department at St. John Catholic University.

Ukrainian hack attack embarrassing Moscow

In October, hackers based in Ukraine claimed to have hacked sensitive emails at the top of Russia's government.

An enormous mass of information was released. The target of the hacking is Vladimir Y. Surkov, a top Russian official and close adviser of President Vladimir Putin. He is now in charge of Ukraine's foreign policy.

The pervasive public controversy connected with Hillary Clinton's emails overshadows the Russia-Ukraine story. More attention and analysis — in-depth — is needed. The information released appears to be genuine. The Atlantic Council, a respected Washington policy institute, vouches for this. The New York Times has checked with several correspondents of Surkov, who tentatively says the documents are authentic. The documents confirm Russia's direct interference in the domestic affairs and efforts to destabilize Georgia after the 2004 ouster of President Viktor Yanukovich, a Putin ally who fled to Russia. Putin annexed Crimea, and has intervened in eastern Ukraine with forces described as "volunteers."

Russia's Black Sea fleet is headquartered in Crimea, where support for Russia is relatively strong. The EU and the Obama administration aggressively protested the invasion and imposed sanctions. The media structure given the structural weakness of Russia's economy.

The violence within Ukraine reflects a wider tug-of-war for influence and influence between the EU and Russia. This competition also encourages NATO involvement, at least indirectly. Also in 2014, Ukraine reached an agreement for association with the EU.

For the U.S., EU and NATO, effective policy may be put in broad historical context. George Kennan, probably the most perceptive American analyst of Russia, wrote in 1954 that Soviet leaders "are not like ... us." War in the depth with Nazi Germany has had a profound continuing impact on the nation, including the current generation. Totalitarianism fed

FIVE EYES, ONE BRAIN

Traditional anxieties regarding territory and national security. Contemporary historic extensions of the Cold War, including sensitive information in Russia, including in Chechnya. Chechen President Ramzan Kadyrov was previously a powerful separatist leader. He was now allied with Moscow. Vladimir Surkov is of Chechen descent. The tough talking officials of the George W. Bush administration pressed the issue of Chechnya. Russia became alarmed. During this period, Georgia launched a military attack on South Ossetia. In reaction, the Russian Army in 2008 invaded Georgia. The Russian invasion of Georgia was also a result of the US and UK. The US and UK were alarmed. During this period, Georgia launched a military attack on South Ossetia. In reaction, the Russian Army in 2008 invaded Georgia. The Russian invasion of Georgia was also a result of the US and UK.

THE SPY ALLIANCE IS WATCHING YOU

By **FRANIS YANUS**

There are five separate "eyes" that are linked together, which observe your every movement and personal life 24 hours a day.

"Five Eyes" is the name of the joint intelligence network of five countries, which are the UK, the U.S., Canada, Australia and New Zealand. The beginning of the network dates to the UKUSA, an agreement to share intelligence signed between the UK and the U.S. in March 1946. Founded by the U.S. and the UK, UKUSA was transformed into the "Five Eyes" alliance by including the British Commonwealth members Canada, Australia and New Zealand over the following years. Thus, the foundation for a giant intelligence network which monitors the communications traffic in all continents from five different points and shares this information with the allied countries was laid.

This alliance between five Anglo-sphere countries is based upon the principles of sharing every kind of intelligence (particularly the signals information called SIGINT) between each other and a vote in favor of member countries. This 70-year-old alliance monitors, analyzes and stores the world's communications today with its built-in global monitoring infrastructure.

The primary intelligence services of these five countries constitute the essential parts of this monitoring system: the U.S.'s NSA, the UK's GCHQ, Canada's CSCS, Australia's ASD and New Zealand's GCSB being the major ones. In addition to this, other numerous subsidiary intelligence services are

of English secret service.

There are satellite dishes, listening and monitoring stations belonging to the NSA and English GCHQ in embassies, military bases and agencies all over the world.

These have immediate access to the security cameras of almost all countries. English and American ships along the Chinese coastline are listening to the radio communications in the region.

These have immediate access to the security cameras of almost all countries. English and American ships along the Chinese coastline are listening to the radio communications in the region.

The satellite dishes stationed in Fort Meade, Maryland, are monitoring banking transactions all over the world.

According to the news reported by The Guardian, in order to gather global communication information, the UK acquired all kinds of personal private information by secretly gaining access to the intercontinental fiber-optic cables that carry the phone communications, messages and Internet traffic. British intelligence agency GCHQ can gather information from 46 of them simultaneously.

This secret program, code named "Tempora," had been in operation for 18 months when the news surfaced, and the amount of data (phone records, SMS messages, emails, internet usage, website login information, social media information from websites such as Facebook etc.) gathered only within that time period was of staggering proportions.

For example, approximately 600 million phone conversations were recorded only in one day. The amount of information gathered daily is equivalent to the capacity of information existent in 192

English National Libraries.

Worse than the US?

Snowden states that this spy network is not the sole work of the U.S., but in fact the main player in the UK, and in order to emphasize the fact that English intelligence services has no limits, he says: **THEY (THE UK) ARE WORSE THAN THE USA.**

Prison and X-rays, which are used by Tempora, are also among the high-tech intelligence gathering, analysis and filtering programs that Five Eyes uses. These can connect to computer servers and satellites in many foreign countries. Another Five Eyes product, ECHELON, which is frequently mentioned in espionage techno-thrillers, is "in use," just like it does with its every kind of imperialistic activity.

It is obvious that the real purpose of this organization, as it has always been, is to gain the most powerful political, military and economic dominance over the world and create the most advanced master of exploitation based on self interests.

These kinds of secret organizations draw their strength from their secrecy.

For this reason, the best way to fight against organizations like Five Eyes is to expose them and bring them out from the darkness. When they hide in the light, to make them transparent. In order to win this fight, the good must be allied together and support each other.

The name Five Eyes, which is used to describe an organization comprised of five countries, requires a brain that rises over these five eyes, evaluates the received information and makes it "seen" and the place to look for this brain is the island of Britain.

Sizning har oningizni, barcha shaxsiy hayotingizni 24 soat kuzatishni maqsad qilgan bir-biri bilan ulangan beshta alohida "ko'z" bor...

"Besh Ko'z" ya'ni Angliya, AQSH, Kanada, Avstraliya va Yangi Zelandiyadan tashkil topgan beshta mamakatning umumiy razvedka tarmog'ining nomi. Asoslari, Angliya va AQSH orasida 1946-yilning Mart oyida imzolangan razvedka almashish to'g'risidagi bitimi **UKUSAga** asoslamadi. AQSH va Angliya tomonidan qurilgan UKUSA kelasi yillarda, Ingliz Millatlar Jamiyati 'Commonwealth' a'zolari Kanada, Avstraliya va Yangi Zelandiyani ham o'z ichiga olib Besh Ko'z' ittifoqiga aylandi. Shunday qilib, barcha qitalardagi aloqa tirafigini 5 alohida nuqtalardan kuzatgan va bilar bilan aloqador ma'lumotlarni bir-biri bilan almashgan katta razvedka hamkorligining asoslari qoyildi.

Besh anglo-sakson mamlakatlarning hamjihatligidan tashkil topgan bu ittifoq, bir-birlariga qarshi josuslik qilmaslik va o'rtalarida har turli razvedka axborotining (birinchi navbatda, **SIGNIT** nomi berilgan aloqa signal ma'lumotlarining) almashinishi asosiga quruldi. Bu 70 yillik maxfiy ittifoq, qurgan global kuzatuv

infratuzilmasi bilan bugun butun dunyo muloqotini kuzatayabdi, tahlil qilayabdi va g'amlamoqda.

Bu besh mamlakatlarning asosiy razvedka xizmatlari ham bu global kuzatuv tizmining asos qisimlarini tashkil qiladi: AQSHning "NSA", Angilyaning "GCHQ", Kanadaning "CSEC", Avstraliyaning "ASD" va Yangi Zelandiyaning "GCSB" tashkilotlari bularning bosh tashkilotlaridir. Shuningdek, bularga bog'liq boshqa o'nlab axborot olish tashkilotlari ham '5 Ko'z' tarmog'ining eng muhim manbalaridir...

Bularning orasida misol uchun, Angilyadagi "RAF" (Royal Air Force) dunyoning eng katta elektronik kuzatuv markazi sifatida bilinmoqda. Bu yerda dunyodagi barcha xabarlashmalarga aralashib (intervensiya) Angilya va AQSH uchun axborot yig'iladi. Bu tizim faqatgina NSA va RAFni o'z ichiga olgani o'ylanganida '5 Ko'z'ning razvedka xajmining kuchu va chegaralari yanada yaxshiroq tushunarli bo'ladi.

Ma'lum bo'lgani kabi, 2013-yilda eski bir CIA va NSA ishchisi bo'lgan kompyuter mutaxasisi (eksperti) Edward Snowden tomonidan, 5 Ko'z mamlakatlari o'rtasidagi maxfiy aloqalarning va bular tarafidan amalga oshirilgan global razvedka operatsiyalarining ma'lumotlari oshkor etildi. The Guardian, Washington Post, Der Spiegel va New York Timesda chop etilgan ma'lumotlar 5 Ko'zning noqonuniy kuzatuv va ma'lumot yig'ish operatsiyalarining tafsilotlarini fosh qildi.

Ma'lumotlarga qaraganda, Ingliz razvedkasining NSA bilan hamkorlikda tinglaganlari orasida, G20 sammitidagi diplomatlar, Germaniya, Brazilya, va Meksika shu jumladan 35 ta mamlakatlarning davlat rahbarlari, siyosatchilari, BM idoralari, elchixonalar, matbuot tashkilotlari, joy olgan. Ingliz maxfiy xizmatining xiyalari orasida, Iroq urushi boshlangan vaqtda Kofi Annanning ofisining hashorat elektron eshitish jihozi bilan tinglangani kabi hodisalarni sanab o'tish mumkin.

Dunyo miqyosidagi elchixonalarda, harbiy bazalarda, vakolatxonalarda NSA va Ingliz GCHQning suniy yo'ldosh antenalari, eshitish va kuzatish stantsiyalari bor. Bular deyarli barcha mamlakatlardagi xavfsizlik kameralariga kirib foydalanish imkoniyatiga ega. Xitoy qirg'oqlari atrofida aylanib yurgan Ingliz va AQSH kemalari mintaqadagi radio aloqalarni tinglaydilar. Merilenddagi Fort Meade bazasidagi suniy yo'ldosh antenalari esa butun dunyodagi bank operatsiyalarini kuzatadi.

The Guardian gazetasi xabariga ko'ra, **Angilya**, dunyo miqyosida aloqa ma'lumotlariga kira olish uchun telefon suhbatlarini, SMS xabarlarni va Internet trafikini tashigan qit'alararo 200 ta optik tolali kabellarga yashirin tarzda kirish orqali har xil maxsus shaxsiy ma'lumotlarga erishgan. Ingliz maxfiy razvedka agentligi GCHQ bir vaqtning o'zida bularning 46tasidan ma'lumotlar yig'a oladi.

Kod nomi "**Tempora**" bo'lgan bu maxfiy dastur, xabar berilgan sanada 18 oydan beri ishlayotgan edi va faqat hattoki bu vaqt davomida to'plangan ma'lumotlarning (telefon qaydlari, sms xabarlari, elektron xatlar, facebook, va boshqalar kabi axborot ma'lumotlari, Internetdan foydalanish, saytlarga kirish qaydlari ...) miqdori ulkan hajmlarda edi. Misol uchun faqatgina bir kunda 600 million telefon suhbatlari qayd etilgan. Kunlik yig'ilgan ma'lumotlar hajmi 192ta Ingliz Milliy Kutubxonasidagi ma'lumotlarga teng miqdorda...

Snowden, bu josuslik tarmoqining faqatgina AQSHning ishi emasligini, asil aktyor Angilya ekanligini bildirdi va Ingliz razvedkasining chegara bilmasligiga alohida urg'u berish jihatidan "**ANGILYA AQSHDAN HAM YOMON**" demoqda.

Tempore kabi, fosh bo'lgan **Prism**, **XKeyscore** ham 5 Ko'z foydalangan ma'lumot yig'ish, tahlil, filterlash maqsadli ilg'or texnologiyali razvedka dasturlari orasidan joy olgan. Bular ko'plab xorijiy mamlakatlarning harbiy va diplomatik muassasalaridagi

kompyuter serverlariga, suniy yo'ldoshlariga ulana oladilar. Bir vaqtlar josus filimlariga tez-tez mavzu bo'lgan, yana 5 Ko'z mahsuloti **ECHELON** esa bularning eng eski va sodda versiyasi.

Ta'kidlashimiz lozimki Yangi Zelandiyaning elektronik kuzatuv agentligi bo'lgan **GCSB** ham boshqalaridan mustasno emas. Osiyo-Tinch okeani linyasida amalga oshgan aloqa ma'lumotlarini NSAning munozarali XKeyscore dasturi orqali yig'ib katta ma'lumotlar paketlari shaklida Angilyadagi va AQShdagi xo'jayinlariga yetkazib bermoqda. Snowdenning ma'lumotlariga qaraganda; GCSB tomonidan to'plangan bu ma'lumotlarning xavfsizlik tahdidlari bilan aloqasi yo'q. Aksincha, GCSB, josuslik faoliyatlarini Yangi Zelandiyaning do'stlari, savdo sheriklari va eng yaqin Tinch okeani qo'shnilaridan iborat keng ko'lamli mamlakatlarga qaratgan.

Faqat bu maqoladagi ma'lumotlar ham, dunoy miqyosidagi umumiy tushunmovchilikning ziddiga, AQSHning 5 ko'zdan faqatgina biri ekanligi, barcha ko'zlarning bir-biriga bog'liq ekanligi, ularni asil boshqarayotgan miyaning esa yuz yillardan beri o'zgarmasdan Buyuk Britaniya orolida ekanligi haqidagi haqiqatni yana bir marotaba ko'rsatmoqda. Bu miya esa muhit, shart va rejalarga qarab ba'zan oldingi o'ringa chiqadi, ba'zan orqa o'rinda yashirinadi.

5 Ko'zning faoliyatlari, hech qanday qonun va chegara bilmasdan, shaxsiy hayot daxilsizligini mensimasdan butun tezligi bilan davom etmoqda. Bu qorong'u struktura, noqonuniy operatsiyalarini, mustamlakachi harakatlarning barcha turlari kabi, "teror tahdidi", "xavfsizlik muammosi" kabi stereotiplarning orqasida yashiringan holda amalga oshirmoqda.

Shubhasiz, bu strukturaning asil maqsadi, har doimgidek, dunyo ustudan eng kuchli siyosiy, harbiy va iqtisodiy hokimyatni qo'lga kiritish; zayif, kuchsiz va nochor ommalarni ezib tashlaydigan eng ilg'or ekspluatatsiya tartibini, eng katta, eng keng va ilg'or manfaatlar g'ildiragini qurishdir ...

Bu turdagi ayyorona strukturalar kuchini maxfiyliklaridan oladi. Shuning uchun 5 Eyesga o'xshash strukturalarga eng samarali mujodala ularni fosh qilish va yashirganlarini zulmatlardan yorug'likga chiqarish, shaffoflashtirishdir. Bu mujodalaning muvaffaqiyatli bo'la olishi uchun yaxshilarning ittifoq bo'lishi va bir-birlarini qo'llab-quvvatlashlari kerakdir.

Five Eyes nomi 5 mamlakatlarni o'z ichiga olgan tuzulmani tasvirlash uchun ishlatilmoqda. Bu 5 ko'zga hokim bo'lgan va kelgan ma'lumotlarni baholab "ko'rib chiqilishini" ta'minlash uchun bir miyaga ehtiyoj bordir. Bu miyani izlash kerak bo'lgan yer esa Britaniya orolidir.

Five Eyes, One Brain... The Spy Alliance is watching you

Nov 19, 2016 Harun Yahya

By Harun Yahya

There are five separate "eyes" that are linked together, which observe your every moment and personal life 24 hours a day.

"Five Eyes" is the name of the joint intelligence network of five countries, which are the UK, the U.S., Canada, Australia and New Zealand. The beginning of the network dates to the UKUSA, an agreement to share intelligence signed between the UK and the U.S. in March 1946. Founded by the U.S. and the UK, UKUSA was transformed into the "Five Eyes" alliance by including the British Commonwealth members Canada, Australia and New Zealand over the following years. Thus, the foundation for a giant intelligence network which monitors the communication traffic in all continents from five different points and shares this information with the allied countries was laid.

This alliance between five Anglosphere countries is based upon the principles of sharing every kind of intelligence (primarily the signals information called SIGNIT) between each other and a vow to never spy on member countries. This 70-year-old alliance monitors, analyzes and stores the world's communications today with its built-in global monitoring substructure.

The primary intelligence services of these five countries constitute the essential parts of this monitoring system: the U.S.'s "NSA," the UK's "GCHQ," Canada's "CSEC," Australia's "ASD" and New Zealand's "GCSB" being the major ones. In addition to this, other numerous subsidiary intelligence services are the most important sources of the "Five Eyes" network.

Among these, for example, there is the RAF (Royal Air Force) of the UK, which is known as the biggest electronic monitoring center in the world.

Here, intelligence is gathered for U.S. and the UK by monitoring the communication networks of the whole world. Even if we consider that only the NSA and the RAF are a part of this system, the strength and the extent of the capacity of "Five Eyes" to gather intelligence can be better understood.

As it is known, the documents revealing the secret relationships between the Five Eyes countries and the global intelligence operations they carried out were exposed by the former CIA and NSA employee Edward Snowden in 2013. These documents, which were featured in The Guardian, The Washington Post, Der Spiegel and The New York Times, brought the details of the illegal monitoring and intelligence gathering operations of Five Eyes into the light.

Far-reaching Tentacles

According to the documents, among the bodies English intelligence service listened and monitored in liaison with the NSA were diplomats from the G-20 summit, the presidents of countries including Germany, Brazil and Mexico, politicians, U.N. offices, various embassies and media outlets. The bugging and the eavesdropping of Kofi Annan's office during the early stages of the Iraq War can be considered as one of the many activities of English secret service.

There are satellite dishes, listening and monitoring stations belonging to the NSA and English GCHQ in embassies, military bases and agencies all over the world.
