

ZEBRASCHÄDEL

Allah has created the zebra with all its magnificent attributes, as He has all other living things. It is Allah Who created their distinguishing and highly attractive stripes that set them apart from other four-footed species. This is the reality that Darwinists are unable to understand, find it difficult to grasp and even, in the majority of cases, stubbornly refuse to see. Paleontology reveals this reality, however, through countless examples. The 3.4-million-year-old zebra skull shown here refutes evolution and declares that Creation is the truth.
