

# RAMADAN 2006 The 10th Day

## **An Ayat**

**To Allah belong the Most Beautiful Names, so call on Him by them and abandon those who desecrate His Names. They will be repaid for what they did.**

(Surat al-A'raf:180)

## **A Hadith**

"The Messenger of Allah (saas) said: "Shake hands, and rancor will disappear. Give presents to each other and love each other, and enmity will disappear. "

(Sahih Muslim)

## **ADVICE FROM OUR PROPHET (SAAS) REGARDING FASTING, BROTHERHOOD AND PROPER MORAL VALUES DURING RAMADAN**

### **Satan Deceives People Making Them Think That Good Is Evil And Evil Is Good**

Satan uses many methods to seduce people into evil. One of these methods is to suggest many and varied false proofs to persuade them to leave the true path, and his proposals are so intricate and elaborated with disingenuous logic that those who fail to look with the eyes of faith are easily convinced. They accept satan's proposals as truth and actually transform their behavior according to what they have been falsely led to believe.

We can find many instances of people who act incorrectly in daily life, having been led into such behavior by satan's deceptions. Because of his suggestions, for example, a person may come to regard a close friend as his enemy. Satan offers so much clear and detailed proof about his friend's ill-intentions that, the deceived person begins to suspect even his friend's well-intentioned behavior and looks for a hidden meaning behind his every word or action. He has fallen so far under satan's influence

of and thinks so much about the suggestions satan has put into his mind that his friend can do nothing to alter his opinion, no matter what well-intentioned efforts he makes.

Sometimes satan makes the same suggestion, but in a totally opposite way. He deceives a person to consider as friends those who will harm him and draw him into evil. Despite clear evidences that a person is ill-intentioned, satan has an explanation for them all and so prevents the deceived individual from seeing the true nature of others' intentions. Satan presents some insignificant details and inflates them, making the deceived person believe that the other's intentions are actually benevolent.

Satan uses these tactics in every matter a person must deal in daily life. As a result, someone he has urged into evil is drawn into ever-greater error and prevented from avoiding the evils he has become immersed in. In reality, however, satan has become a close friend of this deceived person and drawn him closer to his own religious ideas and moral qualities. About this matter, the Qur'an says:

**If someone shuts his eyes to the remembrance of the All-Merciful, We assign him a satan who becomes his bosom friend. They debar them from the path, yet they still think they are guided.** (Surat az-Zukhruf: 36-37)

## EXAMPLES TO LIVING FOSSILS:

### HICKORY LEAF

**Age:** 65 to 54 million years old

**Size:** 7.6 centimeters (3 in)

**Location:** North Dakota, USA

**Period:** Paleocene

This North American hickory leaf fossil, 65- to 54-million-year-old, is evidence that these trees did not evolve from another plant. Leaves of a hickory that lived millions of years ago and the ones that live today are identical.

### TARBUG

**Age:** 1.8 million to 11,000 years old

**Location:** LA Brea Tar Pits, Los Angeles, California, USA

**Period:** Pleistocene

This insect, no different from those living today, is evidence that all living beings have been created.

## THE NAMES OF ALLAH:

### AL-BARI The Maker

He is Allah - the Creator, the Maker, the Giver of Form. To Him belong the Most Beautiful Names. Everything in the heavens and earth glorifies Him. He is the Almighty, the All-Wise. (Qur'an, 59: 24)

There is equilibrium and harmony in everything in this universe we inhabit. As new advances are made, especially in the field of science, and hitherto unknown facts emerge, that equilibrium and harmony grow ever clearer. Every system in the universe is the design of a superior Intelligence. The possessor of that intelligence created everything within an amazing order. Every single body in the universe, and all the billions of living things in this world continue to exist in a most magnificent order. That order in nature never fails, and that has been the case for millions of years.

This stunning harmony between the universe and life on earth is a clear proof of Allah's creative artistry.

## THE EVOLUTION DECEIT:

### The 99% Genetic Similarity between Man and Chimps Is A Deception

For a very long time, the evolutionist choir has been propagating the unsubstantiated thesis that there is very little genetic difference between humans and chimps. In every piece of evolutionist literature, you could read sentences like "we are 99 percent equal to chimps" or "there is only 1 percent of DNA that makes us human". Although no conclusive comparison between human and chimp genomes has been done, the Darwinist ideology led them to assume that there is very little difference between the two species.

A recent study shows that the evolutionist propaganda on this issue-like many others-is completely false. Humans and chimps are not "99% similar" as the evolutionist fairy tale went on. Genetic similarity turns out to be less than 95 %.

A biologist at the California Institute of Technology based this on a computer program that compared 780,000 of the 3 billion base pairs in the human DNA helix with those of the chimp. He found more mismatches than earlier researchers had, and concluded that at least 3.9 percent of the DNA bases were different.

This led him to conclude that there is a fundamental genetic difference between the species of about 5 percent. (<http://www.cnn.com/2002/TECH/science/09/24/humans.chimps.ap/index.html> )

New Scientist, a leading science magazine and a strong supporter of Darwinism, reported the following on the same subject in an article titled "Human-chimp DNA difference trebled":

*We are more unique than previously thought, according to new comparisons of human and chimpanzee DNA. It has long been held that we share 98.5 per cent of our genetic material with our closest relatives. That now appears to be wrong. In fact, we share less than 95 per cent of our genetic material, a three-fold increase in the variation between us and chimps. (<http://www.newscientist.com/news/news.jsp?id=ns99992833>)*

## **Creation, Not Evolution, Is the Origin of Human Consciousness**

The theory of evolution cannot explain how human consciousness emerged. Unconscious atoms and chance cannot account for human beings who found civilizations, produce works of art, establish scientific fields from medicine to archaeology, philosophize, rejoice and feel amazement, compose music, take pleasure from the arts they have created, enjoy the taste of yogurt, have friends, understand such concepts as loyalty, self-sacrifice and love, feel longing, build space vehicles, invent the microscope and the light bulb—and study the atoms that comprise their own bodies. It is impossible to account for consciousness in terms of any materialist philosophy that regards a human being as an assemblage of matter. By themselves, the atoms and molecules in the brain can neither feel, nor know anything, nor speak. Consciousness is an attribute of the human soul; and it is God Who bestows that soul on human beings.

## **THE SIGNS LEADING TO FAITH :**

### **Compass In The Ant's Eye**

We need guides to show us the direction when we travel to another country or another city. In particular, when we do not know the place we are going to, we definitely must have a compass and a map. We find the way by using these tools and consulting other people so we do not get lost. Have you ever wondered how other creatures find their way? Have you ever thought how an ant seeking food in the desert returns to its nest?

Black desert ants inhabiting the Mediterranean coasts of Tunisia are among those creatures who build their nests in the desert.

As the sun rises, temperatures in the desert reach up to 70°C (158°F). The ant leaves its nest to find food in the heat of the day. Frequently halting and turning around itself, it follows a devious route within an area that may be 200 metres (655 feet) away from the nest. But do not think that the ant will get lost because of these zigzags. Once it finds a source of food, the ant follows a straight course and returns to the nest. With respect to their sizes, this journey of the ant may be compared to a man's returning to his starting point taking a straight course after wandering 35-40 kilometres (22-25 miles) away from that point in the desert. How is it that an ant successfully does a task that is virtually impossible for a human?

It cannot be that the ant finds its direction by looking at objects. Signs and way-marks such as trees, rocks, rivers or lakes which help one find the way are quite rare in the desert. There is only sand all around. Even if there were such signs, it would not make any difference since it is not possible for an ant to keep these signs in mind, to memorise where they are and to use them while finding its way. Thinking about it this way, one can better understand the significance of the task that the ant performs. The ant can perform this difficult task thanks to the special body structure it has been given.

This system that Allah placed in the ant's eyes is more advanced than mechanical devices that determine direction. Being able to perceive some rays that we cannot, the ant can determine directions

and know where north and south are. Thanks to this ability, it is not difficult at all for the ant to estimate where its nest is and to return to it.

Human beings have lately become aware of the characteristics of light. However the ant has known and used a characteristic of light, which was unknown to human beings, since it was born. Certainly such a perfect structure as the eye of this ant cannot be attributed to random coincidences. Indeed, eyes of all desert ants have been equipped with this system since the first day they came into existence. Allah, the All-Knowing, created these eyes for them.

#### **BOOK OF THE DAY:**

##### **Islam And Buddhism**

[www.islamandbuddhism.com](http://www.islamandbuddhism.com)

In recent years, Western societies have seen the emergence of an unusual current that draws attention to itself by its rather strange life style. It's made up of individuals who want to attract attention by adopting Eastern culture, beliefs, and philosophies-of which the most important is Buddhism. Read the perverted philosophy of buddhism in this site.

#### **SITE OF THE DAY:**

##### **DARWINISM-WATCH. COM**

[www.darwinism-watch.com](http://www.darwinism-watch.com)

Every morning you are likely to come across misguiding news in your daily or various magazines opposing the fact of creation. In this site, you will find the most "accurate" answers to such recently published evolutionist explanations in magazines newspapers and broadcasts.
