

# The Cause Of Great Alarm: Atlas Of Creation

A report titled "Darwinism and Religion" in the 9 May, 2007, issue of *Le Soir*, Belgium's widest-read French-language daily, noted the serious alarm the *Atlas of Creation* had provoked in Belgium. This panic, which

stems from the powerful nature of the *Atlas of Creation*, left the Belgian government powerless to do anything other than issue bans. The report in question announced that a debate was to take place, including the subject of the *Atlas of Creation*, in the wake of this proscriptive censorship policy in Belgian libraries:

A large number of French educational institutions have received a luxuriously printed work called the *Atlas of Creation*, which maintains that the theory of evolution, and Darwinism in particular, is in error because it is incompatible with religion. This work was prepared from the Muslim perspective. **It has led to enormous alarm** among the relevant political authorities and educationalists...

"Preventing to loan the Bible in libraries? Should the *Atlas of Creation* be kept out of libraries?" The answers to these questions will be discussed at a debate on the subject of "Should the Bible enjoy primacy in libraries?" to be held this evening.

There is no doubt that banning a book merely inspires greater interest and curiosity in it; it therefore results in many more people reading it. And the *Atlas of Creation* has attracted many more people's attention because of the climate of panic that has emerged. What is more, all of Harun Yahya's works, including the *Atlas of Creation*, are available in a wide range of languages free of charge from the [www.harunyahya.com](http://www.harunyahya.com) web site. This means that at a time when the use of technology is becoming ever more widespread, anyone wishing to read the *Atlas of Creation* can obtain it free of charge in a matter of just a few seconds.
