

# The light of the Turkish-Islamic union will illuminate east Turkestan

In recent statements Adnan Oktar has imparted the welcome news that the Science Research Foundation (BAV) and the Foundation for the Preservation of National Values would be making a great cultural offensive for the foundation of the Turkish-Islamic Union and for all Muslims in difficulties to attain peace and security. This cultural activity, including informing and educating the public on such matters as the importance and urgency of the Turkish-Islamic Union, the kind of union it will be, and the solutions it will bring to existing problems, has already begun to have an effect. In addition to crucial developments taking place in the Caucasus and the Middle East, the question of East Turkestan, which had for a long time been almost entirely forgotten, has once again begun being raised in the Turkish press.

## THE TURKISH-ISLAMIC UNION IS THE SOLUTION TO THE "EAST TURKESTAN QUESTION"

Muslims are living under difficult circumstances in various regions of the world. The people of East Turkestan (Xinjiang) in the extreme West of China, for instance, have been exposed to severe repression for the last 50 years in particular. Life in East Turkestan, the majority of whose population are Uighurs, is far more troubled than any other region of China. The number of people killed in East Turkestan together with post-1965 massacres is the unbelievable figure of 35 million.

Occupation, repression and sanctions have brought the region nothing but tension, disorder and hatred. The days of exploiting nations by such means are dead and gone. For that reason, if China permits the people of East Turkestan to govern themselves and grants the country economic independence it will gain enormous advantages. An East Turkestan able to manufacture freely within its own borders, living in freedom and freed from the influence of fear and oppression, can represent a new center of progress for China.

These rights can be given to the people of East Turkestan thanks to the Turkish-Islamic Union, which will enjoy great power and authority. If such a power acts as guarantor, China's relations with the millions of Muslims in the country will be strengthened. China must be convinced and given guarantees that an East Turkestan that is emotionally bound to the Turkish-Islamic Union will not behave in a hostile manner toward China but will contribute to China's becoming a super-power.

The world needs peace, love, solidarity and justice. And that is the mission that the Turkish-Islamic Union will assume when it is set up. This union will exist to bring peace to the world, not to be an instrument of hostility, vengeance or menace. This union will not be one based on oppression and repression along the lines of "everyone must be subjects to us, and anyone who does not must be enslaved." The Turkish-Islamic Union is a union of love and understanding.

By means of this union, members of all faiths will be able to worship as they wish, to visit all the sacred sites of their faith, and their goods, lives and honor will be guaranteed by the Turkish-Islamic Union.

Contrary to the scenarios of clash of civilizations, this union will draw civilizations closer to one another. As a result, the whole world will benefit from the climate the union will bring about. The foundations of the union are love, affection, compassion, altruism and solidarity. In addition, it also aims to elevate humanity to the highest levels of respect for human beings, art, science and technology.

The Turkish-Islamic Union, which represents a population of around 1 billion spread over a very wide area and will knit all its individual components together, will constitute a large economic market. This, in turn, means a wide-ranging commercial opportunity especially for China. This must therefore be very carefully explained to it.

Terrorist activities in the Turkish-Islamic zone will be totally eradicated, and those who incite terrorism will find themselves confronted by the highly deterrent army of the Turkish-Islamic Union military pact. The unitary structures of the states comprising the union will be maintained. Secularism will be one of the fundamental principles of the union. For that reason, both Muslims and non-Muslims will be able to live in security under the same strong roof.

The Turkish-Islamic Union also represents a major opportunity to resolve the disputes regarding Israel and Palestine. Today the peoples of Israel and Palestine are forced to live uneasily behind walls in order to maintain their own security. When the Turkish-Islamic Union is established there will be no need to build walls stretching for many kilometers, nor for any other precautionary measures.

The foundation of the Turkish-Islamic Union is being awaited with the greatest enthusiasm and excitement by the entire Turkish and Islamic world.

FOUNDATION ON THE PRESERVATION OF NATIONAL VALUES

An interview given by Adnan Oktar in 2008 to the the East Turkestan Asia RFA radio station contained the following statement:

**Asia RFA:** You mention this in your book Communist China's Policy of Oppression and East Turkestan, but since 1949 China has executed millions of Muslims among its own

citizens, but when we look at the media what we see is the U.S. invasion of Iraq, Afghanistan and later Palestine. Work out how many people are being killed every day. But the most painful thing today is the thousands of people in East Turkestan executed and including just for writing books or poems. Tens of thousands of people, but the world is silent. Why?

**ADNAN OKTAR:** EVERYONE WHO FAVOURS THE IDEA OF THE TURKISH-ISLAMIC UNION SHOULD MAKE A HUGE OUTCRY ON THIS SUBJECT. WE WILL BE STARTING OUR OWN WORK IN THAT REGARD IN THE NEXT FEW DAYS. WE BEGAN WITH AZERBAIJAN. IT IS NOW THE TURN OF EAST TURKESTAN.... **(Asia RFA-June 14, 2008)**

In the last few months, both Adnan Oktar's statements on the subject and also announcements issued in various newspapers on the subject of East Turkestan by the Foundation for the Preservation of National Values, of which he is honorary president, have begun to bear fruit. The press have again begun carrying stories regarding East Turkestan, and the Turkish public have started being made aware of the troubles and sufferings of their brothers in those lands. This information again raises the issue of the urgency of the establishment of the Turkish-Islamic Union and accelerates the steps being taken on that road by means of it. By God's leave, it will be through the Turkish-Islamic Union that East Turkestan achieves well-being and enlightenment. With the foundation of the Turkish-Islamic Union, both East Turkestan and China will be able to breathe easy, and tension, fear and doubt will give way to peace, love and prosperity. The Turkish-Islamic Union acting as guarantor will also strengthen relations with the millions of Muslims living in China. An East Turkestan emotionally ties to the Turkish-Islamic Union will clearly also be in China's interests.

**Adnan Oktar:** Go to East Turkestan, for instance, and you will see delightful people there. There are highly virtuous, pure Muslims there. Women or young people, they all possess immaculate Islamic moral virtues. Muslims have degenerated in many places, but not there. When we go to Turkistan, for example, we are amazed at the immaculate, well brought up people we meet there. Communism has had the exact opposite effect. And that is a blessing from God. They have remained quite spotless. They have been insulated. Nobody has been able to damage them. **THE UNION WILL BE A VERY PURE ONE, AND IT LOOKS AS IF CAN EASILY COME ABOUT WITHIN 10 OR 15 YEARS. (Asia RFA-June 14, 2008)**

Timeturk news portal site, 23 September 2008

"What is going on in East Turkestan?"

## Doğu Türkistan'da neler oluyor?

Komünist Çin'in baskısı altında tarihinin en zor zamanını geçiren Doğu Türkistan'da son zamanlarda yaşananları Dünya Uyghur Kongresi Başkanı Seyit Tümtürk anlattı.

Cumartesi, 20 Eylül 2008 05:00

### Haber Merkezi / TIMETURK

Ramazan'da teravih kılınmasını, erkeklerin sakal bırakmasını ve memurların oruç tutmasını yasaklayan komünist Pekin hükümetinin Doğu Türkistan'daki insanlık dışı uygulamalarını Dünya Uyghur Kongresi Başkanı Seyit Tamtürk anlattı.

Uyghur Müslümanlarının son yıllarda işgal altındaki Müslüman bölgede yaptıkları baskıları birinci elden anlatan Tamtürk'ün İngilizce yayın yapan bir sitedeki açıklamalarını TIMETURK okuyucularının istifadesine sunuyoruz.

### UYGHUR MÜSLÜMANLARI SESLERİNİ DUYURAMIYOR

Çin komünist rejimi sesimizi dünyaya duyurmamıza izin vermediğini biliyorsunuz. Olimpiyat Oyunları'ndan önce olanlar Çin'in işgalci yetkililerinin Doğu Türkistan Müslümanlarına yaptıklarının doğal bir sonucudur. Bu Müslümanlar o kadar zalim bir baskı altındadır ki seslerini duyurabilmek için başka bir yol görememektedirler.

Eğer Doğu Türkistan Müslümanlarının tarihine bakarsanız, barışçı yolları tercih ettiklerini görürsünüz. Fakat Çin yetkililer bu çabaları görmezden gelerek onları bu yola yöneltmişlerdir. Yine de biz hala sorun için barışçı yollardan yana olduğumuzu açıkça söylüyoruz.

### İSLAM'I ANLATMAK YASAK

İnsanlar dava özgürlüğüne sahip olmak istiyorlar ancak Çin'in işgalci yetkilileri valizlerin İslam'ın ne olduğunu anlatmasına izin vermiyorlar. Bizler Doğu Türkistan'da İslam'ın anlatılması özgürlüğünü istiyoruz. Çin komünist yetkililerinden temel insan haklarından olan din özgürlüğünü tanınması için çağrımızı sürdürüyoruz. Çince yayın yapan İslami kanallar da aynı nedenden yok. Çin'in işgalci yetkilileri herhangi bir İslami kanalı yasaklıyor.

**Adnan Oktar:** China should let East Turkestan go, should let its people live in freedom, that it keeps killing; about people being killed just for looking up to the sky or down on the ground. This oppression is something that not even someone totally devoid of conscience should be capable of. China is doing this and belittling itself before the world. It is disgracing itself. It is disgracing everything. It is disgracing its own state and nation, and must stop doing so. It must think about this and do these things from a conception of honesty, of rationality and of proper behaviour. **It must withdraw from East Turkestan and leave it as a free country. Then you will see how the world opens up to China.** Turkey will adopt a most excellent view of it. Workers from Turkey will go to work in China, and others from there will come here. It will adopt a totally different line. But there will always be anger in the nation's heart so long as this open wound continues to bleed. Many people, many businessmen for example, do not go to China to do business because of that hatred. Who would willingly go to a country that kills so many people, that commits so many murders? Everywhere is full of human blood. You will have to wade through human blood to go anywhere there today. No Muslim can wade through human blood. They must clean that blood up. **They must put a stop to these killings and this oppression will be lifted. Let them allow East Turkestan to be democratic. Secular. Let it take its place in the world as an independent country. China will be enriched many times by that. It must not imagine it will lose out by it. It will gain prestige, not lose it. This is not something to be made a question of pride. (Asia RFA-June 14, 2008)**

"China is applying 'state terror'."

# Çin 'devlet terörü' uyguluyor

Dünya Uygur Kongresi Başkanı Rabiya Kadir, Çin yönetiminin Müslüman Uygur Türkleri'ne yönelik 'devlet terörü' uygulamaya devam ettiğini söyledi.

Pekin hükümeti tarafından terörist ilan edilen Rabiya Kadir, sürgünde yaşadığı Münih'te yaptığı açıklamada, Çin güvenlik güçlerinin 9 Temmuz'da Urumqi şehrinde yaptığı ev aramasında 5 Uygur öğrenciyi vurarak öldürdüğünü söyledi.

Kadir, aynı gün 2 Uygur vatandaşının, silah zoruyla meydana toplanan 10 bin kişi önünde idam edildiğini belirtti. Kağgar bölgesinde ise 19 ve 20 Temmuz tarihlerinde yapılan baskınlarda yaklaşık bin 500 kişinin terör gücüyle kayıtlı olarak silahlanmış olduğunu belirtti. "Bu devlet terörüdür. 1999'dan bu yana, Çin hükümeti baskın terörist öldürmüştür. İddiasıyla imha etmeye çalışıyor" dedi.

Kadir, Müslüman Uygur Türkleri'ne yönelik baskıların, 2008 Pekin Olimpiyatları öncesinde daha da güçlendiğini ifade etti.

"Chinese oppression in East Turkestan continues: 2 Uyghurs have been executed and 15 imprisoned"

# Doğu Türkistan'da Çin zulmü sürüyor

## 2 Uygur idam edildi 15'i hapse atıldı

Olimpiyat oyunlarının yapılacağı Çin'de, işgal altındaki Doğu Türkistan halkına karşı uygulanan baskı ve sindirmeler yoğun boyutlara ulaştı. Doğu Türkistan'ın Uygur Özerk Bölgesi'nde "terörist" bağlantılı olduğu gerekçesiyle 2 Uygur vatandaşının idam edilip 15'inin hapse atılması, Müslümanlar arasında tepkiye neden oldu.

**PEKİN**  
Çin'in işgal altındaki Doğu Türkistan'ın (Sincan) Uygur Özerk Bölgesi'nde "terörist" bağlantılı olduğu gerekçesiyle 2 Uygur idam edildi, 15'i de hapse atıldı. ABD merkezli Radio Free Asia'nın (RFA) Sincan'daki yerel yetkililere dayanarak verdiği habere, Kağgar Halk Mahkemesi'nde görülen davada Muhtar Seteveldi ve Abdull Emin'in ölüm cezasına çarptırıldıkları ve 9 Temmuz'da Yeni Şehit kasabesindeki duruşmanın hemen ardından idam edildikleri belirtildi. Çin, Perşembe günü 8-24 Ağustos 2008'de Pekin'de yapılacak olimpiyatlara saldıran planladıkları iddiasıyla 5 "terörist grubu" çıkarttığını, bu yılın ilk altı ayında da yine olimpiyatları tehdit edebilecek iddiasında Çin-

**Adnan Oktar: This needs to be made clear to the Chinese state in the most appropriate terms possible.** China may perhaps imagine that this union will be to its disadvantage. **But it will benefit China, save it, in all regards. It will save it in military terms, and protect it from any external attack. It will also save it economically.** The Chinese people are still struggling, and this will enable it to modernize. I see in the papers how the people are still living in places resembling barns. They are desperately poor. Those people will live in much greater ease. **CHINA SHOULD SUPPORT THE TURKISH-ISLAMIC UNION FOR THE SAKE OF ITS OWN PEOPLE. This is not a colonialist or selfish union. It is a union of love and friendship, a union of solidarity and toleration, of moderation, built on a basis of secularity.** In other words, it will be grounded in secularism, and this is most important. **If it is secular, peaceful and a pro-democratic system, there is no**

**reason for China to be worried by it.** This may be more through the work of civil society organisations if China is to be convinced, of course. **But we will be putting in some considerable activity in that direction in the next few days. This is an idea that will free China from those unnecessary fears and enable it to abandon these classic policies of state.** Because in classic state policy whatever you do there is somewhere of benefit to you and you go and invade it. You crush the inhabitants and live there yourself. But there is no need to suck blood in order to live. You can do it with love and friendship. It is unbecoming of China to live by sucking blood. **(Asia RFA-June 14, 2008)**

**Adnan Oktar: This is a sign that the time for the liberation of East Turkestan has come.** We must make the very best use of this period. Because East Turkestan is home to the world's most immaculate Muslims, and perhaps its best behaved people. **It is somewhere inhabited by the most insulated, select people. I have witnessed this for myself. It is therefore crucially important that these people be freed from oppression, a matter of honor for the whole world.** It is a debt of honor for the whole world. This Turkic state has to be freed from Chinese hands. It is unacceptable for China to interfere in it. Let East Turkestan live freely as a state in its own right with its own means. **If China wants to trade it can go and trade with it. There is no question of East Turkestan attacking China. So what does China want? What does it gain? If it wants to gain something, that can be commercial. So let East Turkestan and China trade together. Nobody will let it colonize it, however, and what other meaning can taking a country captive have? What does China want from East Turkestan and what does it stand to gain by making it a captive?** What happiness can that bring it? What joy will that bring to its heart? What victory is that? It must withdraw from East Turkestan completely. Let the people who live there be free to go to mosques and factories. Let them talk freely and enjoy religious festivals once again. China must now do a good deed there. The time has come. China must stand up and admit it has made a mistake. This country is one that deserves independence. There was no need for us to intervene. There was no point and no logic in it. This is unacceptable in the 21st century. **We are withdrawing our troops. And we are lifting our political pressure. The whole world will love China when it announces it is a free country. Everyone will respect it. China must commit this good deed. (Asia RFA-June 14, 2008)**

and put before the public, by way of the press. Public pressure will wear China down. We will be working to force it into a corner in the days to come, in the major press, with full-scale announcements, in editorials and in television reports... (Asia RFA-June 14, 2008)

Once Vatan, 13 July 2008

"China has executed 2 Uyghurs from East Turkestan"

## ÇİN, DOĞU TÜRKİSTANLI 2 UYGUR'U İDAM ETTİ

PEKİN - Çin, Doğu Türkistanlı (Sincan) 2 Uygur'u idam etti. Terörle suçlanan 15 Uygur da hapse mahkum edildi.

Merkezi ABD'de olan Hür Asya Radyosu, Muhtar Setivakdi and Abduveli İmin'in Kaşgar'da mahkemede suçlu bulunduktan hemen sonra çarşamba günü idam edildiklerini bildirdi. 3 Uygur Türkü de idama mahkum edildi fakat infaz 2 sene tecil edildi. 12 Uygur da 10 seneye müebbet hapis arasında cezalara çarptırıldı.

Bu 17 kişi, Doğu Türkistan İslam Hareketi'ne mensuptu. Bunlar, Ocak 2007'de Pamir Dağları'ndaki Aktu bölgesinde Çin

güvenlik kuvvetlerinin bir kampa yaptığı baskında yakalanmıştı. Operasyonda Çin güvenlik kuvvetleri tarafından 18 kişi de öldürülmüştü. Çin ve ABD, Doğu Türkistan İslam Hareketi'ni uluslararası terörist gruplar arasında kabul ediyor.

Uygur Amerikan Demeği de Çin'in terör suçlamalarını Uygur Türklerini iyice baskı altında tutmak için kullandığını bildirdi. Uluslararası Af Örgütü de daha önce Çin'e, terörle mücadele adı altındaki uygulamalarla Uygurlara uzun süredir uyguladığı baskıları haklı göstermeye çalıştığı suçlamasında bulunmuştu.

**Adnan Oktar:** Culture is what is needed. We need to raise a top-quality generation. Highly devout, aware, anti-Darwinist, anti-communist, anti-Marxist, highly intelligent professors, scientists, doctors, lawyers, China cannot withstand that force. In other words, there is an irresistible force – culture. China will be bent in half in the face of that. Let them attach great importance to culture. Let them visit my web sites and read all of my books, which can be downloaded for free. Let them read them all and be made really conscious. Let them look meaningfully into China's eyes. China will pull back. It cannot stand up to it, China is not strong enough. No power can withstand culture. You say the Sun has risen. Someone else says he does not believe you. So you lift the edge of the curtain and let it fall again; it is all over with in a second. If there are a hundred people there, they will all be convinced straight away. **If the young people of East Turkestan who have fully absorbed the fact that Darwinism does not exist and who have become expert at telling people of that in a beautiful manner, can spread that message wherever they go, then East Turkestan will become a bastion of steel.** Then what if Chinese troops strolled there, skipped along there? They would be like a bird riding on the back of a lion. The matter is turning East Turkistan into a lion; even if it has four crows riding on its back it will still be a lion. It will go wherever it so wishes. **The bonds of brotherhood must be strengthened, no concessions must be made when it comes to culture, and their immaculate state must be further reinforced. And that is how things must continue. (Asia RFA-June 14, 2008)**
