Turkey will save Europe

Haberturk, January 28-2010

The Wall Street Journal noted that the European Union could increase its declining influence in the international arena if Turkey is a full member of the E.U.

<u>Azerbaijan National News Agency, 14</u> August-2008

Adnan Oktar: As a matter of fact, Turkey is the biggest nation of the world. I'm not exaggerating; I mean the biggest nation. That's what is going to happen; Turkey will join the European Union as the leader of the big Turkish Islamic Union. This will strengthen and support Europe, Russia's condition will get better, both Armenia and Israel will calm down and the Palestine problem will be solved. TURKEY IS A NATION THAT CAN SAVE THE WHOLE WORLD. She is like the insurance of the world; an extremely important nation. **THE** WHOLE WORLD WILL BEGIN TO **REALIZE THIS FACT WITHIN 10-20** YEARS and Turkey will turn the whole world into a brotherhood. This is insha'Allah Allah's law, this is destiny insha'Allah.

Malatya TV, 26 December-2008

Adnan Oktar: Final events established this even more. There have been very serious developments about the Turkish Islamic Union. There are surprising developments. But AFTER THIS ECONOMIC CRISIS, TURKISH ISLAMIC UNION BECAME A NECESSITY. THERE IS NO SECOND SOLUTION RIGHT NOW.

Interviewer: What would the European Union or the United States of America say to this?

Adnan Oktar: The SALVATION OF THE EUROPEAN UNION or America IS WITHIN THE TURKISH ISLAMIC UNION. IF TURKISH ISLAMIC UNION IS NOT ESTABLISHED, THEN both America and EUROPE WOULD COLLAPSE. I mean both sides are headed towards a collapse. Interviewer: Do you think that the European Union would accept this? Or do they accept what you have just said?

Adnan Oktar: This is technical reality. They will see that this is technical truth in the following years.

Interviewer: So what would Turkish Islamic Union's contribution be to the European Union?

Adnan Oktar: The richest petroleum and mineral sources are within the region of the Turkish Islamic Union. The world needs both minerals and petroleum. The world economy is based on those. We will offer them high quality petroleum and minerals in bulk with inexpensive prices, and transfer technology in return. We will offer them technology. And we will achieve a structure that super nations would just dream of, with this mutual cooperation insha'Allah. People will see what a real super nation is like.
