

RAMADAN 2010 - The 13th Day

The keys of the Unseen are in His possession. No one knows them but Him. He knows everything in the land and sea. No leaf falls without His knowing it. There is no seed in the darkness of the earth, and nothing moist or dry which is not in a Clear Book. (Surat al-An'am, 59)

Whoever remains patient, Allah will make him patient. Nobody can be given a blessing better and greater than patience. (Bukhari)

Death: the moment when worldly pleasures end

Everyone attached to this world knows, but would prefer to forget, that every one will die one day. Death will wipe out all that they have done to establish a life based upon this world's values. Death will undo long years of amassing possessions and gaining other people's admiration. An individual may be rich, attractive, respected and well-known, but he will lose all his material wealth in a moment. In a short time his body will deteriorate to the point where no one wants to come near him; then it will be interred in the ground to rot away. This is the final end for which a non-believer spends decades of effort towards his achievements in this world. Living a life filled with earthly desires and straining to taste every pleasure to the fullest will do nothing to alter that person's final end. Death will erase all these pleasures. Death will be a moment in which all the desires and passions of a person who denies Allah will come to an end; at that moment he will begin an eternal life of hardship and sorrow. Allah informs us of what they will experience:

How will it be when the angels take them in death, beating their faces and their backs? (Surah Muhammad: 27)

If you could only see the wrongdoers in the throes of death when the angels are stretching out their hands, saying: "Release your selves! Today you will be repaid with the punishment of humiliation for saying something other than the truth about Allah, and being arrogant about His signs." (Surat al-An'am: 93)

... and one leg is entwined with the other: that Day he will be driven to your Lord. He neither affirmed the truth nor prayed; rather, he denied the truth and turned away. And then went off to his family, swaggering. It is coming closer to you and closer. Then closer to you and closer still. (Surat al-Qiyama: 29-35)

From this, we can see that death is an undeniable reality and, unless Allah wills otherwise, it will be the beginning of eternal agony for all those who deny Him. But some people try to think as little about death as possible while they are alive; they want to forget it and try not to mention it. That is, until death comes... Finally realizing that they have spent their whole lives suppressing their conscience and denying death's reality, they immediately take refuge in Allah, hoping to find salvation. But they are too late, for:

And your Lord arrives with the angels, rank upon rank. And that Day Hell is produced, that Day humanity will remember; but how will the remembrance help people? They will exclaim: "Oh! If only I had prepared in advance for this life of mine!" (Surat al-Fajr: 22-24)

Allah gives people a lifetime to see the true path and to know His mercy. Those who refuse to take advantage of this will regret their decision:

They will shout out in it: "Our Lord! Take us out! We will act rightly, differently from the way we used to act!" Did We not let you live long enough for anyone who was going to pay heed to pay heed? And did not the warner come to you? Taste it then! There is no helper for the wrongdoers. (Surah Fatir: 37)

People should know that Allah will not accept the entreaties of those who make only a death-bed repentance. For this reason, everyone should heed Allah's reminders while there is still time and submit to Him before that inevitable, irreversible moment arrives. If a person makes it his goal to enjoy the pleasures of this Earthly life, he must consider, even if he does not want to, that one day these things will definitely come to a close. When the span of life that Allah has given an individual comes to an end, all the pleasures he pursued will lose their value; they will rot along with his body in the earth. This is a plain truth that everyone must understand. In addition, they should realize that denying Allah only brings unhappiness in this world, regret at the hour of death, and agony in the world to come, whereas belief brings a depth of spirit that enables them to enjoy this world's pleasures to the greatest extent and abundant pleasures forever in the Hereafter. People must see the difference between these two states and must submit to the Divine light of belief to escape the darkness of denial.

The Symmetry in Nature Cannot Originate by Chance

One of the most striking points producing harmony in the universe is symmetry. Living things have symmetric structures. Anything we see in nature, a seed for instance, a fruit or a leaf we examine will show us symmetry in their structure. Let us take a leafy plant. Leaves wind around the body of the plant like a spiral. This is a certain type of symmetry. Similarly, an observable order rules in the arrangement of the grains of a seed and in the design of the veins of the leaf.

Butterfly wings are another example of the symmetry in nature. On both wings of a butterfly are the same shades of color and patterns. A pattern on one wing is also present on the other in exactly the same place.

We can see many other examples of symmetry around us, a few of which we summarized above. The important thing however is that there is a common conclusion to be drawn from all the given examples. There is a matchless order, or to be more exact, a magnificent artistry displayed in living things. One of the greatest evidences of the fact that the universe could by no means have come into being by coincidence is this subtle order and artistry. In his book titled "The Theory of Evolution and Bigotry", Prof. Cemal Yildirim states this fact although he is an evolutionist himself:

"It is far from being convincing to attribute this order in living things, which seems to have a particular purpose, to chance or coincidence".

God created everything in the universe within a larger order. God has control over all things.

Your God is One God. There is no deity but Him, the All-Merciful, the Most Merciful. In the creation of the heavens and Earth, and the alternation of the night and day, and the ships which sail the seas to people's benefit, and the water which God sends down from the sky – by which He brings the earth to life when it was dead and scatters about in it creatures of every kind – and the varying direction of the winds, and the clouds subservient between heaven and earth, there are Signs for people who use their intellect. (Qur'an, 2:163-164)

Satan imparts weariness and fatigue. People can at once be joyful through faith and lively through their own will

MALIK YAWM AD-DEEN
The King of the Day of Judgment

The King of the Day of Judgment... (Surat al-Fatiha, 1:3)

On the Day of Judgment, people will be resurrected and gathered together to account for their deeds. On that Day, they will have neither the will nor the opportunity to pay attention to the people around them, whether they are their parents, spouses, or children. Due to this Day's fearsome nature, everyone will pay attention only to themselves, for:

What will convey to you what the Day of Judgment is? Again! What will convey to you what the Day of Judgment is? It is the Day when a self will have no power to

help any other self in any way. The command that Day will be Allah's alone. (Surat al-Infitar, 82:17-19)

On that Day, anything to which a person attaches too much attention will be reduced to insignificance. From then on, any mundane relation or kinship will lose all importance, for the only value that will remain is one's faith in Allah. No one will be able to help another person, for only Allah, if He wills, can save a person from this detrimental situation.

Each of us will be alone before Allah's presence, the Owner of the Day of Judgment, just as we were alone when we were first created. Each of our deeds and thoughts will be displayed on the Day of Judgment, for He never forgets any detail, no matter how small. Allah creates a setting that befits His Honor and calls His servants to account. However, He saves anyone He wills through His mercy.

On this Day, when unbelievers will be overwhelmed by a grievous regret, believers will be joyful and exuberant:

... On the Day when Allah will not disgrace the Prophet and those who had faith along with him... (Surat at-Tahrim, 66:8)

That is because "Allah will certainly help Messengers and those who believe both in the life of the world and on the Day the witnesses appear." (Surah Ghafir, 40:51)

The sole king of that Day is Allah, for He is the only One Who can command. The related verses read:

There will be but one Great Blast, and then their eyes will open. They will say: "Alas for us! This is the Day of Reckoning!" This is the Day of Decision you used to deny. (Surat as-Saffat, 37:19-21)

Woe that Day to the deniers, those who deny the Day of Reckoning. No one denies it except for every evil aggressor. (Surat al-Mutaffifin, 83:10-12)

Hazrat Mahdi (as) is descended from the line of the Prophet (saas)

Narrated by Ali (ra), the Messenger of Allah (saas) said:

Even if there remains only one day for the world, **Allah, the Exalted, will send a man from the Ahl al-Bayt (People of the House).** (Sunan Abu Dawud, 5:92)

Days and nights will not end **until one [Hazrat Mahdi (as)] from my Ahl al-Bayt** rules the entire world. (Al-Uqayli, An-Najmu's-saqib fi Bayan Anna'l Mahdi min Awladi Ali b. Abu Talib Ale't-Tamam wa al-Qamal)

Hazrat Mahdi (as) is from the line of my daughter Fatima. (Sunan Ibn Majah, 10:348)

Hear the glad tidings of Hazrat Mahdi (as). He is one **from the Quraysh and from my Ahl al-Bayt**. (Al-Muttaqi al-Hindi, Al-Burhan fi Alamat al-Mahdi Akhir az-Zaman, p. 13)

Hazrat Mahdi (as) is one of my children. His face is like a star shining in the sky. (Ali Ibn Sultan Muhammad al-Qaari al-Harawi al-Hanafi, Risalat Mashrab al Vardi fi Mazhabi 'I Mahdi)

All prophets are related to one another. Hazrat Mahdi (as) will also be of that line. These descendants are popularly known as sayyid. Hazrat Mahdi (as) will also be sayyid.

Allah refers in the Qur'an to messengers all related to one another. These verses indicate that Hazrat Mahdi (as) will share that same line of descent.

Allah chose Adam and Noah and the family of Abraham and the family of 'Imran over all other beings – descendants one of the other. Allah is All-Hearing, All-Knowing. (Surah Al 'Imran, 33-34)

"Our Lord, make us both Muslims submitted to You, and our descendants a Muslim community submitted to You. Show us our rites of worship and turn towards us. You are the Ever-Returning, the Most Merciful." (Surat al-Baqara, 128)

And some of their forebears, descendants and brothers; We chose them and guided them to a straight path. (Surat al-An'am, 87)

Unable to Account for a Single Protein, Darwinists Now Place Their Hopes in Fossilized Footprints

Darwinists discovered a new tool for speculation and rushed to pontificate about it with a single voice. The subject of the speculation in question was some footprints discovered in Poland belonging to a life form thought to date back 395 million years. In order to cover up their defeat, Darwinists claimed that these perfect prints belonged to "the first life form to move from water to dry land."

Darwinist propaganda is based on a fictitious history that never happened as if it were actually reality. Some people may therefore find it perfectly normal for Darwinists to make

illogical claims, supported by no evidence, regarding the fossil. The fact is however, that Darwinists are **DECEIVING** people. In particular, not a single transitional fossil exists to confirm such a fictitious event as the "passage from water to land." (And not such on that subject; Darwinists have not a single transitional fossil to support any transition scenarios.) Darwinists' attempts to use

PERFECT FOOTPRINTS as evidence for this nonsensical claim, is totally illogical.

Darwinist scenarios of supposed evolution and once again been overturned

These footprints are exceedingly clear evidence that a perfect amphibian (a species of crocodile probably around 2.5 meters long) was living on Earth 395 million years ago. Darwinists' amazement stems from the fact that these prints conflict with the false transition scenarios "from the primitive to the more developed." In their view, no such perfect and complex terrestrial life form should have existed 395 million years ago. But the fossil records have always refuted Darwinists' false evolutionary chronologies, and are still doing so today.

Here it will be useful to reiterate that the only supposed evidence that Darwinists had for their claims regarding a transition from water to land, that they repeated for so many years, was the Coelacanth. Darwinists' engaged in such wide-ranging speculation about the fossil remains of this creature that people only realized they had been deceived when a living Coelacanth was caught. The Coelacanth, a bottom dwelling fish, completely rebutted all the claims about its supposed "primitive" nature. Since then, more than 300 living Coelacanths have been caught, and faced by their perfection and complexity, Darwinists no longer raise the subject at all.

The prints in question totally eliminate the Darwinist claims about Tiktaalik, the second fossil they sheltered behind after the Coelacanth debacle. Because these prints are 18 million years older than Tiktaalik, which Darwinists claim is a transitional fossil. Nonetheless, however, the prints are perfectly regular and belong to perfect, fossilized feet. There is no evolution here. Just perfectly regular footprints from a living thing. These footprints are 18 million years older than Tiktaalik, which Darwinists seek to depict as moving from water to dry land and whose fins, in their view, were just supposedly turning into feet. This eliminates the latest false proof on which Darwinists were relying and totally overturns the deception of a transition from water to dry land.

Tiktaalik

No matter how much fanfare Darwinists may make, this fossil, just like the others, totally overthrows the false concept of evolution. The first prints found on land and perfect ones. Not a trace exists of the evolution that Darwinists maintain happens as a result of mutation. The toes are in a perfect sequence. The animal was created in a manner ideally suited to carry its own weight. The steps it took show it walked in the same way as crocodiles today, and no error can be seen in the prints' symmetry. The animal is not a deformed one that came into being through chance, haphazard mutations, but a perfect species of crocodile created, with its perfect and flawless body, in a single moment.

This point is very important:

Darwinists are inevitably defeated on all their claims. But the point that needs to be made clear here, **AND THAT TOTALLY DEMOLISHES DARWINISTS, IS THE FACT THAT THEY ARE**

UNABLE TO ACCOUNT FOR A SINGLE PROTEIN in the claws of the animal that left these prints behind. Darwinism **COMES TO A DEAD HALT HERE**. Darwinists can produce as many claims as they like about fictitious evolutionary stages, footprints, fictitious fins and feet or dinosaurs trying to fly, **BUT EVOLUTION ALREADY COLLAPSES AT THE VERY INITIAL STAGE OF LIFE**. The pitiful Darwinist statements made, the pages of description and the scientific papers in the world's best known Darwinist journals are all part of an intense mass deception. By making such statements, Darwinists are trying not to let on that they have been routed by a single protein. What really obliterates Darwinism, before fossils, paleontology, microbiology, genetics and the complexity in living things, IS A SINGLE PROTEIN.

By the will of Allah, this is the century in which **A SINGLE PROTEIN**, invisible to the naked eye, created by Allah as a work of His artistry, has totally demolished Darwinism and brought this terrible deception to an end. Despairing Darwinist wriggling will serve no purpose from now on.

Say: 'Call on those you make claims for besides Allah. They have no power over even the smallest particle, either in the heavens or in the earth. They have no share in them. He has no need of their support.' (Surah Saba', 22)

HEMOGLOBIN AND IRON

At the time the Qur'an was revealed, nobody was aware of the molecule hemoglobin and there was no such medical term in existence. Hemoglobin, which transports oxygen and carbon dioxide in the blood in our bodies and that gives blood its red color, was only discovered in the 19th century.

Hemoglobin forms thanks to the element iron (Fe) in our bodies and is of vital importance to the performance of vital functions. The element iron (Fe) present in the middle of hemoglobin binds itself to oxygen and thus carries oxygen in the blood. For that reason, the hemoglobin molecule can be considered together with the element iron.

In verse 25 of Surat al-Fath, the letters comprising the words Fe (iron) and hemoglobin miraculously appear side by side. In addition, the letters comprising hemoglobin do not appear side by side in any other verse. This exceptional circumstance is one of the proofs of the Creation of Almighty Allah, the Lord of the past and future, He who is unfettered by time.

* The word hemoglobin is written almost the same in Turkish, Arabic, English and other languages. The letters comprising the word hemoglobin appear side by side from left to right.

HACKBERRY LEAF

Age: 45 million years
Period: Eocene
Location: Green River Formation,
Wyoming, USA

Hackberries are generally medium-sized trees, reaching a height of 10 to 25 meters (33 to 82 feet).

Like all other plants, hackberries have always remained as hackberries, as is testified by the fossil record. All hackberry fossils unearthed to date reveal that the hackberries of today are identical with those that lived tens of millions of years ago. This exact similarity refutes the theory of evolution.

The world appreciates Turkey

What He Said

Azerbaijan State News Agent, August 14, 2008

Adnan Oktar: Actually, Turkey is the greatest state of the world. I am no exaggerating, it is the greatest country. It will be like this; as the leader of the Turkish-Islamic Union, Turkey will join the European Union. By this way; Turkey will both back up Europe, and will strengthen Europe. Also Russia will be recovered, Armenia and Israel will be relieved, the Palestine affair will be solved. **TURKEY IS A COUNTRY THAT WILL SAVE THE WHOLE WORLD. TURKEY IS LIKE AN INSURANCE OF THE WHOLE WORLD.IT IS A VERY VITAL COUNTRY.ALL OF THE WILL START TO SEE THIS IN 10 TO 20 YEARS AND TURKEY WILL MAKE THE WHOLE WORLD AS BROTHERS AND SISTERS TO EACH OTHER.** It is the law of Allah InshaAllah, the destiny is like that InshaAllah.

Konya TV - February 28, 2008

Adnan Oktar: Turkey's mission is to be the leader of the Turkish-Islamic World. There is a great mission falls to the Turkish nation. The leadership of the Turkish-Islamic world is one of the greatest mission in the world history. This is one of Turkey's most important mission. In other words; we are not only responsible for saving Turkey, but also we are responsible for saving the whole Turkish-Islamic world. Turkey doesn't really resemble to the other nations. This is not racism. Turkish nation is very faithful. Turkish people are very good-tempered, they are humanistic, very compassionate and they are very self-sacrificed. For instance; go to a village as a guest. The most beautiful part of the house is reserved for the guest. The nicest food is served for the guest, the nicest beds is prepared for the guest, with the nicest glasses beverages are offered. What does that mean? It means that; our nation is not egoist, not self-centered; they are affectionate, self-sacrificed, a very ardent nation. They are willing to die for the

sake of Allah, they are a very excited nation.

What Happened

Türkiye - May 23, 2010

Birleşmiş Milletler Genel Sekreteri Ban Ki Moon:

Türkiye'yi dünya TAKDİR EDİYOR

Ankara'nın, hem bölgesel hem de küresel ilişkilerde giderek artan etkin rolünden memnuniyet duyduğunu belirten Genel Sekreter Moon, Başbakan Recep Erdoğan'ın liderliğini ve Dışişleri Bakanı Ahmet Davutoğlu'nun dış politikasını son derece takdir ettiğini belirtti.

Harika Bir Gecede (ANKARA)

Birleşmiş Milletler Genel Sekreteri Ban Ki Moon, İstanbul'da düzenlenen "2010 Türkiye'nin Dış Politikası" konferansında Türkiye'nin dış politikasını ve liderliğini takdir etti. Moon, Türkiye'nin, hem bölgesel hem de küresel ilişkilerde giderek artan etkin rolünden memnuniyet duyduğunu söyledi. Türkiye'nin liderliğini ve dış politikasını son derece takdir ettiğini belirtti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

diğer girişimleri ile insanlara yararlı katkıları için teşekkür etti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

ÖZGÜLLÜK KONFERANSI

"Küresel ve bölgesel düzeyde Türkiye'nin liderliğini takdir ettiğini belirtti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

Yeni bir dünya için çalışmaları için teşekkür etti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

İRAN VE NÜKLEER

Moon, İran'ın nükleer sorunu çözmesi için çalışmaları için teşekkür etti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

İRAN'DA ANLAŞMA ZAMANI

Moon, İran'ın nükleer sorunu çözmesi için çalışmaları için teşekkür etti. Moon, Türkiye'nin dış politikasını ve liderliğini takdir ettiğini belirtti.

BM Genel Sekreteri Ban Ki Moon, İstanbul'da düzenlenen "2010 Türkiye'nin Dış Politikası" konferansında Türkiye'nin dış politikasını ve liderliğini takdir etti.

[Miracle in the Eye](#)

Before you finish reading this sentence, approximately one hundred billion (100,000,000,000) operations will have been completed inside your eyes.

The eye, the subject of this site, is one of those organs of the body that have kept evolutionists on the ropes ever since Darwin, who himself confessed, "I remember well the time when the thought of the eye made me cold all over." A close examination of the eye's structure and functions will make it clear why evolutionists have felt compelled to avoid it.

[The Evolution Impasse I](#)

The aim in compiling this anthology is to let readers easily obtain information on all matters concerning evolution and to have access to the most accurate facts. You can thus acquire the most practical, accurate and reliable information regarding all the terms and concepts you may encounter regarding the theory of evolution in the press, in magazines, books, TV programs and other media.

The hypothetical claims made by those who advocate the theory of evolution—and how their assertions are invalidated by the scientific facts and recently discovered evidence—are set out in an encyclopedic format, under alphabetical headings.
