

RAMADAN 2010 - The 17th Day

Allah is He Who created the heavens and the earth and everything between them in six days and then established Himself firmly upon the Throne. You have no protector or intercessor apart from Him. So will you not pay heed? (Surat as-Sajda, 4)

**A person asked Allah's Messenger (saas): "What is faith?" He said: "When a good deed becomes a source of pleasure for you and an evil deed becomes a source of disgust for you, then you are a believer." He again said to Allah's Messenger (saas): "What is a sin?" Whereupon he said: "When something pricks your conscience, give it up."
(Tirmidhi)**

The outlook of people of faith on death

"Every soul shall taste death. You shall receive your rewards only on the Day of Resurrection. Anyone who is spared the Fire and admitted to the Garden will surely triumph. The life of this world is just the enjoyment of delusion." (Surah Al 'Imran, 185)

Death will come upon every man existing in this world at a predestined time in compliance with the verse, **"Every soul shall taste death. In the end you shall return to Us". (Surat al-'Ankabut, 57)** Nothing a man possesses, neither property, fortune, status, fame, grandeur nor good looks can ward off death. Death is a law of Allah; no one can escape this absolute and unavoidable fact. As the verse, **"Wherever you are, death will catch up with you, even if you are in impregnable fortresses..." (Surat an-Nisa', 78)** reminds us, there has never been anyone who could succeed in escaping from death.

This fact is an issue about which people of faith attain a profound understanding. Once they comprehend the certainty and closeness of death, they understand that they need to prepare for the life after death. Fearing an imminent death that may come upon them before attaining the moral perfection Allah demands from His servants and earning His approval, they embrace the religion of Allah with great sincerity and enthusiasm. They lose no time in drawing nearer to Allah and earning His approval, since they realise that they may meet death at any moment. The prayer of believers in the Qur'an is as follows:

... Originator of the heavens and earth, You are my Protector in this world and the Next. So take me as a Muslim at my death and unite me with those who are sincere. (Surah Yusuf, 101)

The people of faith accept death with full submission, since it is a law of Allah. Over and above this, they consider it as a gate through which to attain paradise. Meanwhile, they never forget that they must strive hard to avoid the punishment of hell and earn the approval of Allah. Believers unceasingly feel fear and hope until they meet death. They hope for paradise because they believe. Likewise, they fear hell since they never find themselves self-sufficient.

The severity of the pain and punishment experienced in hell is incomparable to any pain suffered in this world. The torment of fire is of various kinds. The people of hell constantly scream to be saved from fire, they are crammed into narrow places; their hands tied to their necks, they writhe in pain. They are whipped with iron whips. Their hunger and thirst become unbearable. Their pain never abates. This dire situation is exacerbated by profound regret, a feeling of desperation and hopelessness. They wish to disappear for all eternity but to no avail. They are addressed as follows:

Roast in it! And bear it patiently or do not bear it patiently. It makes no difference either way. You are simply being repaid for what you did. (Surat at-Tur, 16)

People of faith continuously contemplate the torment of hell depicted in the Qur'an and turn towards Allah. One of perfected faith always keeps in mind that he can, at any moment, meet the angels of death and thus pass on to the hereafter. His decisions, attitudes, behaviour and the way he speaks reflect his commitment to being worthy of paradise and staying away from hellfire, because no one in this world can be exempt from divine retribution.

Aware that "**scales of justice**" (**Surat al-Anbiya', 47**) will be set up on the Day of Judgement, he does not want to miss an atom's weight of good. Allah has warned people on this subject as follows:

That Day people will emerge segregated to see the results of their actions. Whoever does an atom's weight of good will see it. Whoever does an atom's weight of evil will see it. (Surat az-Zilzal, 6-8)

Similarly, he strictly abstains from any act that would incur the disapproval of Allah, because each act he commits will draw him closer either to paradise or to hell. Nothing exists beyond these two places.

Believers who have a certain awareness of these facts feel constant "fear and hope" throughout their lives. They never forget the state of people awaiting to be taken either to paradise or to hell on the Day of Judgement.

How would someone behave if he were at the crossroads of paradise and hell right at this moment and realised that his eternal life would begin in earnest after his being judged?

Being right on the verge of hell, would he ever dare to display a displeasing attitude, which would immediately be taken into account?

Certainly not! On the contrary, anybody in such a dire situation would do anything to attain paradise and would draw on his wisdom and conscience to display the attitude most pleasing to Allah. Even a person who had never engaged in such a serious effort throughout his life, deeming the Day of Judgement distant from himself, would feel great panic and strive to make up for his misdeeds. But on that day, no time is granted to make amends. The time granted terminates with death and records are thereupon finalised. From that moment on, no one will be requited for anything other than what he has done.

Having an unshakable faith in the hereafter, paradise and hell, and keeping their minds occupied with the remembrance of death, account for the unflagging efforts of people of perfected faith. To avoid fear and regret in the hereafter, they consider themselves as if awaiting Allah's verdict on them on the Day of Judgement at every moment of their lives. They prepare themselves for the afterlife with clear consciousness and faith, in the manner of one who has seen the beauty of paradise and the horrors of hell with his own eyes and returned to this life. Therefore, in the face of each situation, they strive to display the best attitude, since they know that any minor heedlessness or unscrupulousness may set

them on a course of regret for which there is no remedy.

To conclude, the utter conviction of those of faith ensures an unswerving commitment to draw nearer to Allah and to stand in fear of Him. In the light of the verse, **"So fear Allah, as much as you are able to..." (Surat at-Taghabun, 16)**, believers fear Allah as much as they can and hope to be worthy of paradise.

The Mass of the Earth and the Planet's Magnetic Field

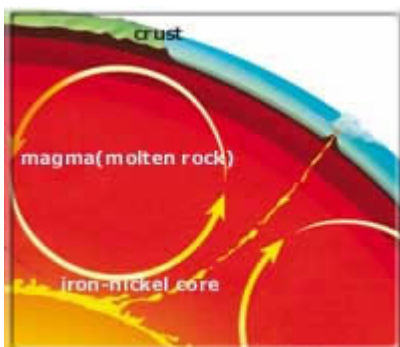

The size of Earth is no less important for life than are its distance from the Sun, its rotational speed, or geographical features. Looking at the planets we see a great range of sizes: Mercury is less than a tenth the size of Earth while Jupiter is 318 times bigger. Is the size of Earth as compared with other planets "coincidental"? Or is it deliberate?

When we examine the dimensions of Earth we can easily see that our planet was designed to be exactly as big as it is. American geologists Frank Press and Raymond Siever comment on Earth's "fitness":

And Earth's size was just about right -not too small as to lose its atmosphere because its gravity was too small to prevent gasses from escaping into space, and not so large that its gravity would hold on to too much atmosphere, including harmful gases.

In addition to its mass, the interior of Earth is also specially designed. Because of its core, Earth has a strong magnetic field whose role in the preservation of life is vital. According to Press and Siever:

The earth's interior is a gigantic but delicately balanced heat engine fueled by radioactivity ...Were it running more slowly, geological activity would have proceeded at a slower pace. Iron might not have melted and sunk to form the liquid core, and the magnetic field would never have developed...if there had been more radioactive fuel and a faster running engine, volcanic gas and dust would have blotted out the Sun, the atmosphere would have been oppressively dense, and the surface would have been racked by daily earthquakes and volcanic explosions.

The magnetic field these geologists talk about is of great importance for life. This magnetic field originates from the structure of Earth's core. The core consists of heavy elements like iron and nickel that are capable of holding a magnetic charge. The inner core is solid while the outer one is liquid. The two layers of the core move around each other and this movement is what generates Earth's magnetic field. Extending far beyond the surface, this field protects Earth from the effects of detrimental radiation from outer space. The radiation of stars other than the sun cannot travel through this shield. The Van Allen Belt, whose magnetic lines extend ten thousand miles from Earth, protects the globe from this deadly energy.

It is calculated that the plasma clouds trapped by the Van Allen Belt sometimes attain energy levels 100 billion times more powerful than that the atomic bomb released over Hiroshima . Cosmic rays may be equally detrimental. The Earth's magnetic field however lets only 0.1% of that radiation through and that is absorbed by the atmosphere. The electrical energy needed to create and maintain such a magnetic field is nearly a billion amperes, as much as mankind has generated throughout history.

If this protective shield did not exist, life would be destroyed by harmful radiation from time to time and might not have come into existence at all. But as Press and Siever point out, Earth's core is exactly designed to keep the planet safe.

In other words, there is a special purpose as stated in the Qur'an:

We made the sky a persevered and protected roof yet still they turn away from Our Signs. (Surat al-Anbiya': 32)

AL-WARITH
The Inheritor

How many cities We have destroyed that lived in insolent ingratitude! There are their houses, never again inhabited after them, except a little. It was We Who were their Heir. (Surat al-Qasas, 28:58)

Throughout their lives, such people strive to accumulate more wealth. Some people are so committed to this end that this goal takes over their lives and leaves them no time to wonder why they exist. However, there is one fact these people disregard:

Say: "Shall I inform you of the greatest losers in their actions? People whose efforts in the life of the world are misguided while they suppose that they are doing good." (Surat al-Kahf, 18:103-04)

Indeed, until their last breath, they strive for a vain purpose. Yet one day, at a totally unexpected moment, they will face the angels of death. Wrapped in a simple shroud, these people, who were widely admired because of their wealth, will be buried in the ground and thus leave everything behind. All they can take with them into their graves is their naked body, their fear, and their closeness to Allah.

Allah is the sole Inheritor of Earth, and His sincere servants are made wealthy by His favor. As we mentioned above, all wealth, status, and respect enjoyed in this world is temporary. Allah, Who grants all of these blessings, takes each person's soul whenever He wills. The Qur'an reveals how each person will be brought before Allah's presence:

We give life and cause to die, and We are the Inheritor. (Surat al-Hijr, 15:23)

And Zakariyya, when he called out to his Lord: "My Lord, do not leave me on my own, though You are the Best of Inheritors." (Surat al-Anbiya', 21:89)

Hazrat Ali reveals in Al-qasidat Al-urjuzah that our Prophet's (saas) name is Adnan

(It is narrated that following one event Hazrat Ali addressed our Prophet (saas), who gave him the title of Abu Turab, as "The Prophet Mustafa Adnan the Hadi.")

I therefore came to have two names. And there is the title I had never heard before. He gave me this title, Abu Turab: **The Prophet Mustafa Adnan the Hadi...**

Darwinists: "We Apologize Once Again, We Were Also Mistaken About Ardi"

Darwinists have had to keep apologizing for the last 150 years; "sorry, that was a hoax," they said, "our mistake, it was a pig tooth, not a human one," they said, "sorry about that, the moths were deliberately stuck onto the trees," "the skull had been planed down," "feathers had been stuck onto the dinosaur by hand," "it appears that this fossil is still alive and not an intermediate form at all," and "the primordial atmosphere was not like that at all," they said. "Embryos are not like this at all, the illustrations are fakes," they said. "We said it was the ancestor of man, but it appears it was just an ordinary ape," they said. They have kept on apologizing and retracting their claims. They have hurriedly withdrawn fossils from museums. Declaring something to be an intermediate fossil in one issue of a journal, they have issued an apology in the subsequent edition. And this has carried on right down to the present day.

The reason is this: **DARWINISM IS SIMPLY A DEVIANT IDEOLOGY, WITH NOTHING SCIENTIFIC ABOUT IT. IT IS NOT SUPPORTED BY EVEN A SINGLE PIECE OF SCIENTIFIC EVIDENCE.** It is for that reason that Darwinists constantly manufacture false evidence. But their frauds are only short-lived.

When their frauds emerge into the light of day, Darwinists then have to stand up before the public and apologize. (You can find more detailed information on the subject here.)

ARDI HAS ALSO RECENTLY BEEN A PART OF ALL THIS FUROR. Darwinists took an ordinary monkey fossil and totally rebuilt the completely fragmented pelvic bone, which its millimetrically small pieces continues to shatter , in such a way as to permit it "to walk upright." One of the main reasons why the fossil in question was chosen as the greatest potential candidate for the imaginary human evolution scenario was the fact that its pelvic bone was reconstructed by Darwinist scientists "in the way they wished." Darwinists did what needed to be done in the name of Darwinism and Ardi was shamelessly portrayed to the whole world as an "upright-walking ape." They had no hesitation in depicting it as the greatest evidence for supposed human evolution. But like all the others, this furor was also short-lived, and the Darwinist fraud soon came out into the light of day and directly, from statements made by Darwinist scientists.

Now it's time **FOR THEM TO APOLOGIZE FOR ARDI.**

The Darwinist William Jungers, head of the anatomical sciences department of the Stony Brook University, Long Island, medical center made this comment about the claims that Ardi represents an "ancestor of man:"

I think some of the things they said might have been for effect.[1]

The Darwinist Tim White from the University of California and his team, who examined Ardi and suggested that it might be the missing link in the supposed evolution of man, had to make this admission:

"There are no apparent features sufficiently unique to warrant the exclusion of Ar. ramidus as being ancestral to Australopithecus,"[2]

The fact that the totally shattered pelvic bone and its surroundings were reconstructed completely in the light of Darwinist scientists' interpretations was also explicitly set out by Darwinist scientists. Jungers said this on the subject:

Maybe the pieces do fit together nicely, but the reality is they start out with a very damaged specimen, and they end up with something very similar to an australopithecine [an imaginary human-like group including Lucy]". "It's very difficult not to make them look like something you have in your mind if there's any chance of play"
... Ardi, requires a lot of guesswork.[3]

After examining the fossil remains Jungers said, "there is no way that they could belong to 'an animal that wasn't often walking on its hind legs' unless the data 'were deliberately ignored or if we had made them up'." [4] With that statement it was revealed that Tim White and his team had perpetrated yet another deception in the name of Darwinism.

It is not only the pelvic bone findings that refute the claims made about Ardi. One article published in Science magazine stated that the anatomy of Ardi's hind feet showed that it was a climbing animal. An article titled "How Humanlike Was Ardi?" by Katherine Harmon of Scientific American magazine said that not a single part of the animal's feet showed that it stood upright. The feet, and the big toes in particular, exhibit features still found in present-day chimpanzees that assist in climbing. Jungers summarizes the situation by saying:

[Ardi] really doesn't show any adaptations for bipedalism at all.[5]

Lacking a single piece of evidence with which to prove their claims, Darwinists are now resorting to the following deception in order to be able to portray this life form as the supposed ancestor of man: "The females were small, because they looked after the young while the males went hunting." This wretched claim is in fact important evidence of the hopeless position in which Darwinists find themselves. It is shameful for a scientist to make such a claim and, on the basis of it, to declare that a perfect bonobo monkey is in fact the ancestor of man. Human beings are not the only living things to have a family life that includes division of labor. Many living things live as families, and both males and females within the family have their own separate tasks. In many it is the males that hunt, while the females take care of the young. Therefore, the fact that the female of a particular life form does not hunt, but looks after the young, DOES NOT, OF COURSE, MAKE IT HUMAN. This ludicrous claim clearly reveals the deception of which Darwinist logic rests.

The Darwinist dictatorship is now in a hopeless position. They are trying to retrieve the position in a state of despair and panic. They are therefore prepared to risk ridicule and espousing nonsensical claims to that end. That is how Darwinism has collapsed and been defeated in the 21st century. Ardi has again made that collapse and rout crystal clear. Darwinists have had to retract all their claims concerning Ardi, and have now realized that they can no longer deceive people as they used to in the past. False fossils that used to be displayed in museums for 40 years are now being exposed for what they really are, and frauds now have a life span of only a few days, or even hours. Darwinists' efforts to bring evolution back to life with false fossils are all in vain. Darwinists themselves now see and admit this.

RADIO RECEIVERS ON MOUNTAINS

We gave Dawud great favor from Us: "O mountains and birds! Echo with him in his praise!" And We made iron malleable for him: (Surah Saba', 10)

A radio telescope on Peach Mountain, in Dexter, Michigan

The description of mountains "echoing" in the above verse may be a reference to the way that radios work. (Allah knows the truth.) The basic principles on which radios operate may be summarized as follows:

The radio system consists of a transmitter and a receiver. The transmitter takes the message to be sent, encodes it in what is known as a "sinus wave" and transmits it in the form of waves. The receiver takes in the radio waves and deciphers the message sent on the sinus wave. In this way, the message is received in exactly the same form as it was sent. The word "awwibi," translated as "echo" in the above verse and meaning "sound being repeated or returned", may very well be a reference to the transmission of these radio waves. (Allah knows the truth.)

Sounds emitted in the form of sound waves by way of an antenna in order that the receiver can take in the data sent are also met by an antenna linked to the receiver. The purpose behind using antennae is the transmission into space of the waves emitted by the radio transmitter. The receiving antenna is intended to collect as many radio waves and messages as possible. That is

why NASA uses giant antennae bowls 70 meters across for its satellites millions of kilometers away in space.

Each of the antennae in the picture weighs 212 tons, is as high as a 10-storey building and measures 25 meters across.

CROCODILE SKULL

Age: 54-37 million years
Period: Eocene
Location: Phosphate Mines, Khouribga, North Africa

"Crocodile" is the general name given to creatures in the Crocodylidae family. Most live in tropical regions, and their earliest known examples lived about 200 million years ago. There is no

difference between crocodiles living today and those that lived about 50 million years ago (like the fossil illustrated here) or even those that lived 200 million years ago. These fossils prove that crocodiles have not changed in hundreds of millions of years. This fact disproves evolution and also demonstrates that God has created all living creatures.

Visa facilitation from Italy to Turkish businessmen

What He Said

The Gulf Today, November 2- 2008

Adnan Oktar: ... Passport will be canceled. **VISAS WILL BE CANCELED, COUNTRIES WILL BE ABLE TO MAKE TRADE AND SHOPPING FREELY WITH ONE ANOTHER; THEY WILL BE BROTHERS.** The initial ground will be laid insha'Allah with Azerbaijan. And among the Muslim countries, it will be Syria. Azerbaijan is a country that is both Turkish and Muslim. Syria is also our Muslim brother. We are going to unite also with Syria insha'Allah. These will be the first steps. And this will develop as an ongoing process. The Turkish-Islamic Union is going to be established within ten to fifteen years insha'Allah.

What Happened

Zaman, 16 February- 2010

Vize anlaşması öncesinde İTO Başkanı Murat Yalçıntaş'a (solda) Türkiye ile İtalya arasındaki ilişkilerin gelişimine yaptığı katkılardan dolayı İtalya Cumburbaskanı tarafından layık görülen İtalyan Devlet Nisanı' verildi. Nisanı, İtalya'nın Ankara Büyükelçisi Carlo Marsili takdim etti.

İtalya'dan işadamlarına vize kolaylığı

NEŞİHAN AYDIN İSTANBUL

İşadamlarının AB ile ilişkilerde karşı karşıya kaldığı vize engeli asılıyor. İstanbul Ticaret Odası (İTO) ile İtalya'nın İstanbul Başkonsolosluğu arasında imzalanan 'Vize Kolaylaştırma Anlaşması' ile işadamları, odadan alacakları 'Tanıma Mektubu'yla 5 yıla kadar Schengen Vizesi alabilecek. Oda Başkanı Murat Yalçıntaş, Schengen Vizesi'nin Türk işadamlarını çoğu zaman zorlayan ve zaman zaman da moralini bozan prosedürler gerektirdiğine dikkat çekerek, işadamların İtalya'dan aldıkları vizeyle diğer tüm Schengen ülkelerine girebileceklerini kaydetti.

İtalya'nın İstanbul Başkonsolosu Massimo Rustico da, Schengen Vizesi için başvuruda bulunan işadamlarına, süreç kâbus haline getirmemek için mümkün olduğunca hızlı davranacaklarını ifade etti. Vize kolaylığından firma sahiplerinin yanında üst düzey çalışanlar da faydalanabilecek. 2005 yılında konsolosluğun 8 bin civarında vize verdiğini belirten Rustico, prosedürlerinde yaptıkları değişiklikle bu sayının geçen yıl 50 bine çıktığını açıkladı ve "Bunu yeterli görmüyoruz. Ben 100 bin vize vermeye hazırım." dedi. Massimo Rustico, oda ile yıllardır sür-

dürdükleri işbirliği ve güç birliğine vurgu yaparak, şu anda üç iş günü içerisinde vize verdiklerini, ancak bu süreyi, acil zamanlarda çok daha kısaltabildiklerini anlattı. "Bir saat içerisinde bile vize verdiğimiz zamanlar oldu." diyen Rustico, iş ilişkileri iyi olan firmaların işlerini daha da kolaylaştırmak için yoğun bir şekilde çalıştıklarını ifade etti. Rustico, geçen yıl İstanbul'da 50 bin, İzmir'de 14 bin ve Ankara'da 6 bin olmak üzere toplam 70 bin vize verdiklerini aktardı.

İstanbul Ticaret Odası'nın 'Tanıma Mektubu'nun verileceği firmalar için belli kriterler gerekiyor. Başvuran firmanın, devamlılığına; devlete ve odaya karşı yükümlülüklerini yerine getirmesine dikkat edilecek. Oda Başkanı Murat Yalçıntaş, "Firmanın bizdeki kayıtları düzgünse, devlete karşı vergilerini aksatmadan ödeyen bir firmaysa, küçük veya büyük bir işletme olması bizim için önemli değil, mektubu verebiliriz." dedi. Başkonsolos Rustico da odadan alınan mektupla başvuran firmalar için öncelik tanıyacaklarını belirterek, "Tabii ki bu firmaların hepsine 5 yıl vize vermemiz söz konusu değil, ama iyi ilişkiler içerisinde olduğunuz firmalara bu imkanı sağlayabiliriz." ifadelerini kullandı.

With the 'Visa Facilitation Agreement' signed between the Istanbul Chamber of Commerce and the Italian Consulate General in Istanbul, with a "Recognition Letter" taken from the Chamber, Turkish businessmen will be able get a five-year Schengen visa.

 - *Living One's Destiny Is a Source of Peace and Comfort for Believers*
 - *Resignation to Destiny*

What is Destiny?

Verily, We have created all things with Qadar.
(Surat al-Qamar, 49)

Destiny is Allah's perfect knowledge of all events past or future, as if a single moment. This expresses the absolute sovereignty of Allah over all beings and events. People can be aware of a certain event when they experience it. But Allah knows all events prior to their occurrence. For Allah, past, present and future are all the same. They are all within the knowledge of Allah since He is the One Who creates them.

As the verse, "Indeed, all things We created with predestination." (Surat al-Qamar: 49) also suggests, every thing in the world is part of that destiny. The majority of people do not give a moment's consideration to the nature of destiny, and, thus, fail to recognize that it is Allah's infinite might that exists behind this flawless order. Some consider that destiny encompasses only human beings. However, everything in the universe, from the furniture in your home, to a pebble on the road, or a dried-up weed, a fruit or a jar on the super-market shelf, are all part of the destiny predetermined by Allah. The fate of every created thing has been determined within the infinite wisdom of Allah.

Destiny is Allah's perfect knowledge of all events past or future, as if a single moment. This expresses the absolute sovereignty of Allah over all beings and events. People can be aware of a certain event when they experience it. But Allah knows all events prior to their occurrence. For Allah, past, present and future are all the same. They are all within the knowledge of Allah since He is the One Who creates them.

Every event a person sees, and every noise he hears, are in ever instance part of a life that has been created for him as a unit. Whether major or insignificant, no event in the universe happens by coincidence. No flower either blooms or fades by chance. No man comes into existence or dies out of pure coincidence. No man becomes sick by mistake, and neither does his sickness develop in an uncontrolled manner. In each case, these occurrences are especially predestined by Allah, from the very moment they were created.

Unawareness: A Sly Threat

Some individuals, unaware of Allah's clear commands and prohibitions in the Qur'an, live their lives according to their own whims and desires. But life is short and will one day end, along with everything else. At that moment, they will be confronted with the punishment of Hell that has been prepared for all those who did not seek to please Him while living in this temporary world.

In the Qur'an, Allah defines unawareness as a lack of awareness and careless attitude regarding the clear evidences of His existence and the evidence of His commands and prohibitions. Unawareness is a great danger for those who are heedless and do not submit to Allah sincerely, because those who are being drawn into unawareness, or who are already unaware, do not understand their situation properly. And even if they are aware of this danger, they do not care. Therefore, read this book in the knowledge that some degree of unawareness might exist within you and then do your best to overcome it. As Allah states in the Qur'an: **"No indeed! Truly humanity is unbridled, seeing himself as self-sufficient" (Surat al-'Alaq: 6-7).**

This book describes unawareness according to the Qur'an and warns people against its subtle danger.
