

RAMADAN 2010 - The 9th Day

Allah is my Lord and your Lord so worship Him. That is a straight path.' (Surah Al 'Imran, 51)

The most perfect believer in respect of faith is he who is best of them in manners. (Sunan Abu Dawud)

Muslims will be strong when united

Just as disputes and quarrels weaken Muslims spiritually, unity and solidarity strengthen them. For instance, destroying irreligious ideologies will be possible only when the Muslims unite.

their intellect. (Surat al-Hashr, 14)

However, what truly makes the believers' union so strong is their faith and loyalty. Since only genuine faith can engender true friendship and alliance, Muslims must love one another with a pure heart and for the good pleasure of Allah, without the slightest selfish interest. A union built on the strongest foundation known to humanity—the fear and love of Allah—will never shatter, unless Allah wills otherwise. With the following verse, Allah points out that success does not depend upon a group's size:

How many a small force has triumphed over a much greater one by Allah's permission! Allah is with the steadfast. (Surat al-Baqara, 249)

An Islamic union based on faith and devotion will provide Muslims with the necessary enthusiasm and willpower for great success.

In another verse, Allah reveals that although the deniers appear to be united, they have not achieved true unity:

Their hostility toward each other is intense. They are full of bravado in each other's company. You consider them united, but their hearts are scattered wide. That is because they are people who do not use

Irrespective of how solid a union appears to be, it is in fact very unstable if it is not built on sincerity and genuine intentions, for this means that it is based only on various interests. And, when any of these interests is threatened, the union will fall apart quickly. Since Allah has revealed this secret in the Qur'an, the Muslims' union is not shaken by worldly losses; rather, it is strengthened. This awareness makes the union very solid. The great Islamic scholar Said Nursi uses the following example to explain why a union formed by sincere Muslims will be strong:

So we are surely in need of solidarity and true union, obtained through gaining sincerity—for the mystery of sincerity secures through four individuals the moral strength of one thousand one hundred and eleven—indeed, we are compelled to obtain it.

...If four times four remain apart, they have a value of sixteen. But if, through the mystery of brotherhood and having a common goal and joint duty, they unite, coming together shoulder to shoulder on a line, they have the strength and value of four thousand four hundred and forty-four. Just as numerous historical events testify that the moral strength and value of sixteen self-sacrificing brothers have been greater than that of four thousand.

The underlying reason for this mystery is this: Each member of a true and sincere union may see also with the eyes of the other brothers and hear with their ears. As if each person of a true union of ten has the value and strength of seeing with twenty eyes, thinking with ten minds, hearing with twenty ears, and working with twenty hands. (*Bediuzzaman Said Nursi, Risale-i Nur*)

Weaving Experts In Nature

Is it possible to say that a creature which builds strong nests made up of interlocked plaits on twigs using very systematic movements, cutting long, thin strips out of fresh, green leaves, has "learned to do this through chance"? Certainly, the claim of "learning by chance" would be a somewhat insufficient explanation for such skills. As you will see in the example we are about to give, many features present in animals openly expose how irrational and unreasonable are the claims of the evolutionists.

The weaver bird first collects the material it will use. The bird either cuts long, thin strips out of fresh, green leaves or it makes use of the middle vein of the leaves. Surely, it has a reason for using these fresh leaves. It would be difficult for the bird to handle material from dry leaves and to use them in weaving, whereas such processes are carried out very easily with fresh leaf fibers. The bird begins the work by first of all wrapping the end of a long strip, torn from a leaf, around a twig. Holding one end of the strip against the twig with one foot, it works the other end with its beak.

In order to prevent the fibers from falling down, it attaches them together by tying a knot. First, the bird makes a loop. This is the entrance to its nest. Then, using its beak like a shuttle, it passes the leaf fibers over and under the other fibers in an orderly way. The bird must calculate how taut it should pull each strip during the process of weaving because, if the weaving is loose, the nest will collapse away. In addition, it must envisage the final shape of the nest so it can decide when the walls of the nest should be curved or be given an outward-projecting shape.

After weaving the entrance, the bird begins to weave the walls of the nest. To do this, it hangs downwards and continues to work from inside the nest. With its beak, it pushes one fiber under another and then holds the free end of fiber and pulls it tightly. Thus, very orderly weaving is formed.

As noted above, the weaverbird always works by following certain steps while building its nest. First, it collects the most appropriate material for the nest. It does not begin to weave its nest from a randomly chosen point but first makes an entrance and continues to build the walls from there. It is certainly impossible to claim that the weaverbirds have acquired these skills by unconscious coincidences. The fact that the weaverbirds also, like all other creatures, act through the inspiration of Allah is an evident fact that every man of reason and consciousness can easily see.

Neither summer sloth nor anything else must ever stop Muslims remembering Allah

AL-FATIR

The Creator; The Originator

"O My Lord, You have granted power to me on Earth and taught me the true meaning of events. O Originator of the heavens and Earth, You are my Friend in this world and the next. So take me as a Muslim at my death, and join me to the people who are righteous." (Surah Yusuf, 12:101)

Earth has a special design that supports life. Its location in space and its special structure, which meets the needs of all living beings, make it clear that this planet is the product of a superior wisdom. Our planet's living beings show that an astonishing design is inherent in all of them. Gifted with an appropriate bodily structure, every living being lives in a suitable setting.

This aside, as we focus more on the details of their formation, the fact of creation appears more clearly. Each cell, the basic unit of every living being, has a perfect system and such a flawless order that it is a clear refutation of the unbelievers' claim that life somehow created itself or is the result of a series of coincidence.

All that we see around us carries traces of an intelligent and purposeful design—a design that belongs to our Creator: Allah. Our Lord's artistry is visible in any detail. Allah relates His system's inherent perfection, as follows:

He Who created the seven heavens in layers. You will not find any flaw in the creation of the All-Merciful. Look again—do you see any gaps? Then look again and again. Your sight will return to you dazzled and exhausted! (Surat al-Mulk, 67:3-4)

Say: "Am I to take anyone other than Allah as my protector, the Bringer into Being of the heavens and Earth, He Who feeds and is not fed?" Say: "I am commanded to be the first of the Muslims" and "Do not be among the idolaters." (Surat al-An'am, 6:14)

Their Messengers said: "Is there any doubt about Allah, the Bringer into Being of the heavens and Earth? He summons you to forgive you for your wrong actions and to defer you until a specified time." They said: "You are nothing but human beings like ourselves who want to debar us from what our fathers worshipped; so bring us a clear authority." (Surah Ibrahim, 14:10)

Hazrat Mahdi's (as) stomach will be wide

His [Hazrat Mahdi's (as)] **stomach large**, and the space between his thighs is open. ... (*Mari' bin Yusuf Karami Hanbali, Fawaid Fawaid al-Fikr fil Mahdi al-Montazar, p. 13*)

He Claim That 'Neanderthals Are The Ape-Like Ancestors Of Man' Is Fraudulent

Darwinists employed the same technique they used with Australopithecus for the Neanderthals, an extinct human race.

Neanderthal Man entered the scientific literature with the discovery in 1856 of fossils in the Neander Valley near the German city of Düsseldorf. The curvatures in its skull and bones led it being regarded by evolutionists as a supposed primitive human species.

In 1908 an almost complete skeleton described as belonging to Neanderthal Man was found in the French region of La Chapelle-aux-Saints. The bones were re-assembled by the famous paleontologist and geologist of the time Marcellin Boule.

The Neanderthal Man that emerged from this re-assembly had a stooped posture and a protruding skull. Its legs were also locked at the joints, meaning it lacked a fully upright posture.

Thanks to this appearance, the impression formed in people's minds that Neanderthal Man was a primitive being. Neanderthals were also depicted as ape-men in fictitious illustrations.

This false impression of the Neanderthals lasted for 100 years. But analysis of the La Chapelle skeleton in the 1950s determined that the Neanderthal to whom it belonged had a kind of joint infection. Healthy individuals were in fact able to walk just like normal human beings.

In 1985 the same skeleton was examined by the anthropologist Erik Trinkhaus. That examination confirmed that Neanderthals walked upright and revealed another fact that had hitherto remained hidden: Marcellin Boule had deliberately portrayed Neanderthal as being stooped. ¹ The joint

disorder identified in the 1950s was no obstacle to the individual walking upright. It appeared that the Darwinist Boule was unwilling to admit that the Neanderthal walked like a normal human being.

E. Trinkaus and W. W. Howells made the following statement in Scientific American magazine: Today most scientists agree that Neanderthal Man stood fully upright and that in the absence of disease, its features are no different than modern humans. ²

Meanwhile, the size of the Neanderthal skull also forced evolutionists into inconsistency. The reason was that Neanderthals had a skull volume of around 1700 cc. This is 200cc more of the volume of today's human beings'. The fact that Neanderthals, supposedly a "primitive" species, had a greater brain volume than Homo sapiens represented a huge contradiction for the theory of evolution.

The Neanderthal expert Erik Trinkhaus admits:

Detailed comparisons of Neanderthal skeletal remains with those of modern humans have shown that there is nothing in Neanderthal anatomy that conclusively indicates locomotor, manipulative, intellectual, or linguistic abilities inferior to those of modern humans. ³

There is no doubt that because the Neanderthals were a human race they possessed the same features as modern races. Neanderthal Man was a talented maker of tools and a skilled hunter. He even engaged in music and art. They had a cultural and social structure, just like societies today, and had religious beliefs. ⁴ The civilization established by the Neanderthals was therefore no different to present-day civilizations.

Something else about the Neanderthals that represent an insuperable dilemma for Darwinists is the problem of dating. Fossils discovered show that Neanderthals were living at the same time as modern human beings and that in some circumstances THEY WERE EVEN LIVING AFTERWARDS. Evolutionist biologist Francisco J. Ayala from the University of California admits:

A few years ago, they [Neandertals] were thought to be ancestral to anatomically modern humans, but now we know that modern humans appeared at least 100,000 years ago, much before the disappearance of the Neandertals. Moreover, in caves in the Middle East, fossils of modern humans have been found dated 120,000-100,000 years ago, as well as Neandertals dated at 60,000 and 70,000 years ago, followed again by modern humans dated at 40,000 years ago. It is unclear whether the two forms repeatedly replaced one another by migration from other regions, or whether they coexisted in some areas. ⁵

The Neanderthals, tried to offered as a so-called ape-like ancestor of man are therefore actually an extinct human race. In the same way that modern-day humans possess different features unique to their own races, so the Neanderthals also had their own unique characteristics. It is a huge fraud to use these as evidence for evolution. Indeed, the Neanderthal man fossil was removed from the scientific literature in 1978. But the Neanderthals still appear in Darwinist references as if they represented great evidence of evolution.

The aim behind the speculations about Neanderthal Man that is still going on in some evolutionist publications is to influence and mislead people who are ignorant of the true facts about the Neanderthals and who are unaware that they were a transitional form that has been scientifically discredited. It is therefore of the greatest importance is to raise the true facts about Australopithecus and the Neanderthals and to put an end to Darwinist deception.

THE OZONE LAYER

The word "ozone" is written and read in just about the same way in Arabic, Turkish and other foreign languages. The letters that comprise the word ozone appear side by side in verse 6 of Surat al-Jinn. Moreover, the verses that follow refer to the "protective" nature of the sky:

We tried, as usual, to travel to heaven in search of news but found it filled with fierce guards and meteors. (Surat al-Jinn, 8)

The "guards" in the sky is highly compatible with the ozone layer of the atmosphere. Because it is the protective layer in the sky, keeping harmful rays away from the Earth.

The appearance side by side of the letters that comprise the word ozone, and in the above verse that refers to the "protective" nature of the sky, cannot be explained by chance. This is a miracle created in the Qur'an by our Lord.

SOLDIER FISH

Age: 95 million years
Period: Cretaceous
Location: Lebanon

The fact that soldier fish living 95 million years ago were identical to those in existence today shows that these fish have never changed over millions of years. This state of affairs, which refutes the Darwinist claim that living things evolved by changing, puts evolutionists in an impossible position. Concrete scientific findings such as the fossil record have proved that evolution never happened.

The solution in Krygyzstan is the Turkish-Islamic Union

What He Said

Ekin TV - March 9- 2009

Adnan Oktar: We said that the solution of everything is the Turkish-Islamic Union. I mean; this affair and the Chechen affair would not be solved otherwise. They will join the Turkish-Islamic Union. The affair will be solved on the day, on the hour, the minute, all the problem will disappear. Also the inequity will end. This agreeable unity that has the Ottoman essence would end the issue. There is conflicts, disorder everywhere; there is also unrest in Turkey, the PKK problem. The Turkish-Islamic Union is a system that will do away with the entire problem. You see; The East Turkestan and Kazakhstan problem will also end. The affair of Syria, the affair of Iraq all of them will end.

Aksu TV - April 10- 2010

Adnan Oktar: Briefly; to be sincere, cordial, to advocate the freedom or to avoid bigotry, to abide by the morality of the Qur'an, to be affectionate as our Prophet Muhammad (saas), to be forgiving, compassionate; namely to have a good moral character is a great blessing. Our people must be very happy, the Turkish-Islamic Union is to be constituted. For instance; see Krygyzstan is in disorder, Kazakhstan is restless, Azerbaijan longs for uniting with Turkey, nevertheless they are also uneasy. An agreeable unity that would terminate them is a must for us to endeavor , Insha'Allah. When there is the Turkish-Islamic Union, the Turkish world will be relieved InshaAllah, they are all Muslim thereby we will have also embraced the Islamic world completely, InshaAllah. Alas, see the people in Iran are suffering, the people in Afghanistan are suffering, the people in Pakistan are also suffering. What a pity, they are wretchedly poor, namely they are hungry, very miserable, they don't have anything to wear, they have children, maidens, mothers there, what a pity. I mean we need to pity them, sympathise them as Muslims. We have an opportunity like that. Turkey is both a modern and a rational country; Turkey is on a line that is adherent to Ataturk's policy, nationalist, namely Turkey is on a consistent line, thereby Turkey is a country which practises Islam in a best way. It is on the most ideal structure. Therefore; the whole Islamic world wants the leadership of Turkey. I mean; if there is a demand like that, Turkey cannot be abstained from it, can it? Turkey needs to accept this for the sake of Allah, that's why Turkey will be the leader of the Turkish-Islamic Union, InshaAllah. A beautiful future is waiting for Muslims, but [it will come true]with our effort.

What Happened

Habervaktim.com - June 16- 2010

BBP Lideri Topçu: En büyük ihanettir!

Büyük Birlik Partisi (BBP) Genel Başkanı Yalçın Topçu, Kırgızistan'da yaşanan olayların etnik çatışma olmadığını, olayı bu şekilde göstermenin Türk İslam dünyasına yapılacak en büyük ihanet olacağını kaydetti.

Topçu, "Kırgızistan'da yaşanan olayların esasında, süper güçlerin bir güç gösterisi içerisinde kardeşi kardeşe kırdırmasıdır." dedi.

BBP Genel Başkanı Topçu, Doğu Türkistan ve Dayanışma Derneği Genel Başkanı ve Dünya Uygur Kongresi Başkan Yardımcısı Seyit Sümürk'ü makamında kabul etti. Topçu, burada yaptığı açıklamada, son zamanlarda Türk Cumhuriyetleri'nde yaşanan olaylara değindi.

İslam dünyasında, emperyalist emeller uğruna asırlardır kan döküldüğünü belirten Topçu, Doğu Türkistan'daki katliam henüz hafızalarda yerini korurken, bir taraftan Gazze, bir taraftan da Kırgızistan'da kardeşin kardeşe düşürüldüğünü belirtti.

Türk dünyasının vicdanının kanadığını aktaran Topçu, "Bu işlerin son bulmasıyla ilgili hükümetlerin acziyet ve çaresizliği bizi kahrediyor. BBP olarak biz, kurulduğumuzdan bu tarafa bütün fertlerin, mensupların bir ideali var; Adriyatik'ten Çin Seddi'ne kaynaşmış ve birleşmiş, dilde, işte ve fikirde birleşmiş olan bir İslam dünyası, Türk dünyası. Bu ülkü ve idealin bu coğrafya içinde her ferde inmesi lazım ki bu kardeş kavgalarını kaşımak isteyen emperyal emeller boşa çıksın." diye konuştu.

Topçu, Türk Cumhuriyetlerinde yaşanan olaylara hükümetin bir an önce el atması gerektiğini kaydetti. Türk Cumhuriyetlerinde yaşanan olaylarda hükümetin bir bilgi dahi almamasının, uluslararası arenada yapılan zulmün sorulmamasını bir eksiklik olarak niteleyen Topçu, "Neticede bunun peşine Gazze gemisi geliyor. Anadoludaki PKK'nın gemi azağı olarak, sazcısıyla sözcüsüyle anadoluda yaşayan 70 milyon insana kafa tutması geliyor." şeklinde konuştu.

Kırgızistan'da yaşanan olayları etnik bir çatışma olarak sunmanın, Türk İslam dünyasına yapmış bir ihanet olduğunu dile getiren Topçu, Kırgızistan'da yaşanan olayların esasında süper güçlerin emperyal emeller peşinde, oradaki narkotik kontrolü ellerinde bulundurmak amacıyla güç gösterisinde, kardeşi kardeşe kırdırma amacıyla olduğunu söyledi. Topçu, şöyle devam etti:

"Bir takım çete gurupları 'Özbekler sizi vurdu', şeklinde yönlendirilerek, burada bir kardeş kavgası başlatılmış oldu. Türkiye Cumhuriyeti bu konuya duyarsız kalmamalı. Türk Cumhuriyetlerinde olan bir meseleyi Şangay Beşlisi'nin insafına terketmek, Türkiye'nin acziyetinin bir göstergesidir. Türkiye, etkin olduğu alanlarda insiyatif ortaya koymalı, bu coğrafyayı, Ankara'ya ve Yozgat'a hangi hassasiyetle bakıyor ve takip ediyoruz? avrı haccacivette hakmalı ve takip etmeli. Hükümet ne yazık ki Türk Cumhuriyetlerine karşı şu anda geldiğimiz noktada sınıfta kalmıştır."

(GİHAN)

The declaration of Dear Yalçın Topçu:

" Since the foundation of the BBP (The Great Union Party) we members and companions have one ideal; **an Islamic and a Turkish world that is merged and united from Adriatic to the Great Wall of China, united in terms of language and notion. It is necessary to spread this ideal and goal to every single individual to frustrate the emperial aspirations that longs for the dispute among brothers**".

[Devoted To Allah](#)

Devoted to Allah

Qays: "My prayer and my rice, my living and my dying, are for Allah alone, the Lord of all the worlds." (Surat al-An'am: 162)

HOME HONORABLE QURAN ABOUT THE AUTHOR CONTACT US

A Muslim's life is concisely described as follows in the Qur'an: "Truly, my prayer and my service of sacrifice, my life and my death, are (all) for Allah, the Cherisher of the Worlds," (Surat al-An'am: 162) Muslims live for the cause of Allah and strive to earn the good pleasure of Allah, arranging their lives according to His Will. A believer who decides to live for the cause of Allah must abandon all the idols of the society of ignorance. Devoted to Allah is a summons to overthrow these idols for good.

THE PURPOSE OF A BELIEVER'S LIFE: THE APPROVAL OF ALLAH;
... Allah will guide to the ways of peace those who follow what pleases Him. He will bring them by His will from darkness to the light, and will guide them to a straight path. (Surat al-Ma'ida: 16)

SEEKING THE MOST OF THE GOOD PLEASURE OF ALLAH
A believer is one who has been purified of idolatry and other forms of ignorance, such as placing his hopes on imaginary deities or seeking their approval, thereby becoming subservient to them. He serves Allah alone and seeks the approval of Allah alone. As mentioned earlier, he does this by "striving with all due striving."

[What Darwinists Fail To Consider](#)

This book's purpose is to reveal those matters that Darwinists fail to reflect on. By so doing, they have declared war on the fact of creation. They attribute the complexity and beauty exhibited in all their magnificence at every point in the universe to change, simply to deny the existence of Allah. They have no qualms about maintaining that unconsciousness and random events gave rise to consciousness, reason, order, understanding and beauty. This book reveals those matters that they heedlessly ignore, or which they claim that the theory of evolution fully explains but without ever entering into details. This book shows how their theory is actually unproven, despairing and in a helpless position in all areas.
