

# European civilization can develop with Turkey

**Channel 5, September 20- 2008**

**Adnan Oktar: Let's join the European Union with glory, honour, magnificence. Let's join as the leader of the Turkish Islamic Union. Otherwise joining the European Union and requesting money, job from them would be unbecoming for the Turkish nation. I mean an attitude that comes to mean, "Save us, please!" would be unbecoming for us. We will go to rescue them. We shall give money to them, we shall provide them economic opportunities and enter as a leader. We shall provide the wealth and power of all the Asian and Islamic countries to them. We shall also provide their technical opportunities to them. We shall serve as a bridge. That is what I mean;** otherwise, I like the art, science and culture of Europe. I surely like its culture, art. I like its architecture. I have a great respect in that sense. I like its democracy. I like its understanding of freedom. Furthermore, they could be even more free and democratic. And I like Turkey to fully adopt the European democracy, even go further. In that sense, of course I want Turkey to join the European Union.

**Channel 35, December 14- 2008**

**Adnan Oktar: Turkey is a great state; they need to ask Turkey to join the European Union. Furthermore, in a sense they should beg for this. Because it is Turkey who will make them wealthy and save them.** Turkey's dynamic power, dynamic youth and dynamic youth of all the Turkic states and their underground sources, mines, oil, natural gas will save them. The capital of the entire Islamic world and oil are standing upright now. **Turkey will be in the ruling position of all of these, will be in a leader, brother position, I mean it will be a channel for Europe. Europe is proceeding towards death; Turkey is the blood, the serum which is urgently needed to save them.**
