Darwinists have for a long time espoused the demagogic idea that “a person can be an evolutionist at the same time as being a believer.” As we have made clear many times before, this Darwinist claim is a huge deception. **EVOLUTION REQUIRES LACK OF BELIEF**. As we have made clear many times before, this Darwinist claim is a huge deception. **EVOLUTION REQUIRES LACK OF BELIEF**. Evolution is a pagan religion launched in order to turn people away from belief in Allah and **TO SPREAD IRRELIGION**. As with all pagan religions, the struggle against belief in Allah predominates in the pagan religion that is Darwinism (Surely Allah is beyond that.)

The sole reason why this fraud, the theory of evolution, that has been around for the last 150 years and is not supported by any scientific evidence, enjoys the protection of the Darwinist dictatorship, is supported by part of the major press, is protected under national laws and kept propped up, not through scientific evidence, but by hooligan behavior and aggression and fraud, is that evolution is a superstitious pagan faith invented to oppose belief in Allah. (Surely Allah is beyond that.)

Evolution seeks to disseminate the idea that all beings came into existence by chance. Through this magical effect people come to believe that they developed gradually and by chance, that they are a kind of animal and that they have no aim or responsibility in this world. Through the materialist and Darwinist world view and belief that they are entirely chance beings, they are being increasingly led toward irreligion. This pagan religion, that takes chance as its false god, has no other aim than to corrupt whole societies, increasingly turn them away from belief in Allah and to produce sinister and oppressive communities.

Darwinists work their hypnosis like that.

It is therefore utterly mendacious and pointless to seek to reconcile evolution with belief in Allah. Evolution is a pagan religion that adherents of Creation must intellectually suppress and eliminate. All believers have a major responsibility in that regard.

Muslims must not forget that there is a conflict in the world between Darwinism, the fundamental philosophy of atheism, and faith. Their aim must be to eliminate Darwinism, liberate people who have fallen into the clutches of Darwinist, atheist ideology and to bring about the joy of faith and peaceful and loving spirit of the Qur’an.
