

Surat al-Isra', 44 (Everything praise and glorify Allah)

(Excerpt from Harun Yahya's live interview dated 24 January 2011)

The seven heavens and the earth and everyone in them glorify Him. There is nothing which does not glorify Him with praise but you do not understand their glorification. He is All-Forbearing, Ever-Forgiving. (Surat al-Isra', 44)

They say the atom is very small, quite tiny. Yet the atom is a whole world, a world like space. Since the orbits around that nucleus are very regular and delightful they have a sound, but we cannot hear it. Each movement produces a sound, but we cannot hear it. What does Almighty Allah say in the verse? "There is nothing which does not glorify Him with praise but you do not understand their glorification." Allah says you cannot hear it. We can hear specific frequencies and detect specific wavelengths. The rest we cannot hear. Insects hear some sounds, for instance, but we cannot hear what they hear.
