

# No Darwinist is really a Darwinist at all

The perfections, symmetry, harmony, detail variety and glory in nature can only exist through a Intelligence. Only a sublime Intelligence can give bees the ability to make combs or the fly the ability to beat its wings a thousand times a second. Only a sublime Intelligence can install a whole city with all its technological details, factories and energy plants in a single cell. Only a sublime Intelligence can create the trillions of cells in our bodies and the proteins that are constantly manufactured, and the cell with its far greater complexity and superior abilities than cannot be replicated even with the intelligence and knowledge of thousands of people and all the means at their disposal. The details are created in order for us to see and appreciate that sublime Intelligence.

The presence of a sublime Intelligence is obvious throughout the universe. Allah shows us His sublime intelligence, in all things and all the time. Scientists in particular see these from even closer up and with greater clarity. For that reason, no Darwinist is in fact a real Darwinist at all. All Darwinists of course know that the intelligence in the cell could never come into being by chance. Of course they are aware that living things did not come into being by chance. It is largely pointless to try to convince them of that fact. They already do not believe the illogical accounts of evolution. Because it is impossible for any rational person to do so.

**Darwinists do not submit to Allah out of arrogance**

**Excerpt from Mr. Adnan Oktar's DEM Tv interview dated September 30, 2009**

It is the Darwinist ideology they fall prey to that causes some people to remain faithful to all this illogicality. The perverse theory of evolution was developed for the sole purpose of being able to deny the existence of Allah (surely Allah is beyond that) ever since ancient Sumerian and Egyptian times. And that is the only reason for its continued survival. It is impossible for such a nonsensical theory to be espoused or to be imposed on whole societies for any other reason.

But there may also from time to time be people who are unaware of the danger posed by Darwinism, or who are oppressed by the Darwinist dictatorship and unwilling to risk their jobs and careers and who have to pretend to believe in evolution since everyone else around them does. If someone has a sound conscience and knows that his conscience tells him the truth, then he must at once abandon his error. It is never too late for that.

The fact shown by science is the mighty artistry of Allah. People must be invited to see and believe in this important truth. Seeing that truth brings with it great peace, happiness and blessings. It will encourage people to understand science better and investigate it in greater detail. The facts revealed by science will enable people to see how Allah manifests His Creation. Science done with love and fear of Allah will represent a source of great beauty, fervor and happiness.

Allah is He who created from nothing. The most glorious titles are His. There is no doubt that Almighty Allah has no need of our Praise or faith (surely Allah is beyond that). He is almighty. It is human beings who need to praise and exalt our Lord, to believe in and remember Him. For that reason, pride against Allah rebounds solely against oneself. Almighty Allah says in one verse that:

**Musa said, 'If you were to be ungrateful, you and everyone on the earth, Allah is Rich Beyond Need, Praiseworthy.'** (Surah Ibrahim, 8)

In another verse, our Lord reveals that:

**Everything in the heavens and everything in the earth belongs to Him. Allah is the Rich Beyond Need, the Praiseworthy.**

**Do you not see that Allah has made everything on the earth subservient to you and the ships running upon the sea by His command? He holds back the heaven, preventing it from falling to the earth – except by His permission. Allah is All-Compassionate to mankind, Most Merciful. (Surat al-Hajj, 64-65)**
