

Ramadan 2011 - The 3rd Day

By it, Allah guides those who follow what pleases Him to the ways of Peace. He will bring them from the darkness to the light by His permission, and guide them to a straight path. (Surat al-Ma'ida, 16)

The real protector and helper of man is Allah, the one who always wills goodness for his servants

Allah, Who creates the life of this world as a place of trial for His servants, bestows infinite blessings to them. Every need or anything he may like is prepared for him even before he is created. Allah created the clean air, birds that fly in the sky, plants of infinite beauty and variety, enormously beautiful flowers, unique blessings, beloved ones, cute living beings, the flawless system in the world and many other details for man alone.

When a person comes into this world he finds every need ready for himself. He is surrounded with great comfort. Everything is compatible with his own dimensions and life conditions. Vegetables, fruit and food of every kind make his body work properly and meet his needs.

Man makes almost no effort to obtain these blessings. He simply leads his life in a perfect environment. Our Lord creates all these blessings for him:

This aside, through His messengers, Allah also revealed a Book to guide us in this life of this world. This Book contains all sorts of knowledge a person may need throughout his life. This fact is related in the Qur'an as follows:

"...We have not omitted anything from the Book..." (Surah Al-An'am, 38)

Allah revealed us a Book full of wisdom to us from which we learn the kind of morality and deeds deserving Allah's good pleasure:

"This is a Book We have sent down to you so that you can bring mankind from the darkness to the light, by the permission of their Lord, to the Path of the Almighty, the Praiseworthy.." (Surah Ibrahim, 1)

What befalls a person who is surrounded with blessings equipped with all those tiny details is to live by the morality which is in compliance with the commandments of Allah related in the Qur'an. He is expected to lead his life as a servant who turns to Allah alone and to shape his life in compliance with our Lord's pleasure.

Allah is also the sole protector and helper of a person who knows that Allah is his only friend and who seeks refuge in His mercy and trusts in His superior intelligence and compassion. A person who knows that everything Allah creates is a manifestation of a superior mind

and that there is goodness in them trusts only in our Lord and seeks refuge only in Him. Consequently one of the fundamental attributes of a person of faith in this life of trial is to put trust in Allah. Putting trust in Allah is to take Allah as a sole friend while engaging in any deed. For a Muslim, it is a requisite of faith to experience the feeling of security that stems from putting trust in Allah since he is aware that it is Allah Who creates every incident throughout his life.

Other than Allah Who continuously creates goodness with His infinitely beautiful morality, there is no one a person can take as a friend. Consequently a Muslim who lives by the morality of the Qur'an only puts his trust in our Lord throughout his life. This is related in the Qur'an thus:

"And put your trust in Allah. Allah suffices as a Guardian." (Surah al-Ahzab, 3)

Splash Tetra Fish; the fish protecting its offspring by a unique method

Splash tetra is a fish about 4 cm in length which habitats in South America's slow-running rivers. The male splash tetra finds a proper leaf bending towards the water and awaits for a female to come. The purpose of the male and female fish is to lay their eggs on the leaf out of the water. When a female accepts the invitation to spawn, the pair leap out of the water together in a perfect manner. During this jump they press each other's bodies to one another and do not separate until they attach themselves by fin suction to the underside of a leaf. Meanwhile the female produces and fertilizes 6 to 8 eggs and then the two fish fall back into the water. This procedure is repeated until as many as 200 eggs are attached to the leaf. Why do the splash tetra fish do not leave their eggs into the water? The answer is, they want to preserve their eggs in the most secure location.

Male Splash Tetra protects its offspring with great self-sacrifice

Once the fertilization of eggs are finished the female fish leaves the environment. However the male fish remains under the leaf for three days and continuously wets the eggs every 10-15 minutes with its fin. At the end of these three days the offspring come out of the eggs and immediately fall to the water.

What would happen if the splash tetra fish would not wet the eggs for three days every 15 minutes? Surely all of the eggs would dry under the sun and the offspring would die.

However this never happens and splash tetra fish produce next generations by means of the self-sacrifice of the male fish. It is Almighty Allah Who inspires self-sacrifice, patience, hard-work and perseverance to this little fish. In one verse of the Qur'an Allah relates:

“There is instruction for you in cattle. ...” (Surat an-Nahl, 66)

Hazrat Mahdi (as) will have the same facilities the dajjal (anti-messiah) has. While the dajjal (anti-messiah) will use them for evil and corruption, Hazrat Mahdi (as) will use them for the Truth

He (dajjal [anti-messiah]) will have paradise and hell with him. ... **HE WILL ALSO HAVE MEN. HE WILL KILL SOME OF THEM AND THEN BRING BACK TO LIFE.**

(Al-Barzanji, Al-Isha'ah li-ashrat al-sa'ah)

The invalidity of the claim that "objecting to evolution stems from a standard psychological unease"

Darwinists claim that people object to evolution on emotional grounds, for which reason they "constantly encounter a diametrically opposite opinion." The fact is, however, that this claim is completely unrealistic.

- The only reason why adherents of Creation oppose evolution is that the theory IS AN ENORMOUS FRAUD.
- The way that adherents of evolution have turned people away from belief in Allah by supporting a fraud for the last 150 years IS AN EFFORT TO FORCIBLY CONVINCING PEOPLE OF A LIE.
- THEY DECEIVE THE ENTIRE WORLD THROUGH A DICTATORSHIP, using false evidence, specious accounts and misusing science, ALTHOUGH SCIENCE SHOWS THE EXACT OPPOSITE.
- The Darwinists in question seem to be forgetting one very important fact that we have set out many times before: if evolution were true, meaning if there were any evidence on Earth supporting evolution, if millions of transitional fossils had been found and if it had been proved that protein could come into being spontaneously and that species do turn into one another, then the first people to admit that Allah created living things through evolution would be THE ADHERENTS OF CREATION .
- If evolution were true, then again it would be the adherents of Creation who show the world the evidence of this in giant books, who hold exhibitions displaying the fossil records and hold conferences all over the world telling people of that fact.
- If there were any such evidence, then Creationists would embrace this even more closely and bring the matter up even more loudly than evolutionists.
- But there is no such evidence anywhere on Earth. EVOLUTION IS TOTALLY DEVOID OF EVIDENCE. In addition to its being bereft of evidence, all scientific information constantly refutes evolution. In short, SCIENCE CONFLICTS WITH EVOLUTION.
- The objection to evolution on the part of proponents of Creation does not, therefore, stem from any psychological unease or ideological feeling. The reason for their objection IS THAT EVOLUTION IS A LIE. THAT THE WHOLE WORLD IS BEING DECEIVED THROUGH A LIE. THAT PEOPLE ARE BEING DELIBERATELY TURNED AWAY FROM BELIEF IN ALLAH IN AN ORGANIZED MANNER, THROUGH A LIE.
- The reason why evolutionists' objections are constantly and persistently refuted IS IN ORDER TO BE ABLE TO DISPROVE A LIE. To be able to show people the truth. Because EVERY WORD SPOKEN FOR THE SAKE OF SUPPORTING EVOLUTION IS A LIE.
- All the evidence shown by science indicates that Allah created and creates life in a single moment. The scientific evidence confirms Creation as revealed by Allah in the Qur'an, in other words, that our Lord performs Creation through issuing the command "Be!" All Darwinists can actually see that fact. It is therefore in fact Darwinists who suffer from ideological unease, who espouse an irrational lie rather than admitting that truth and who are engaged in a desperate struggle against it.

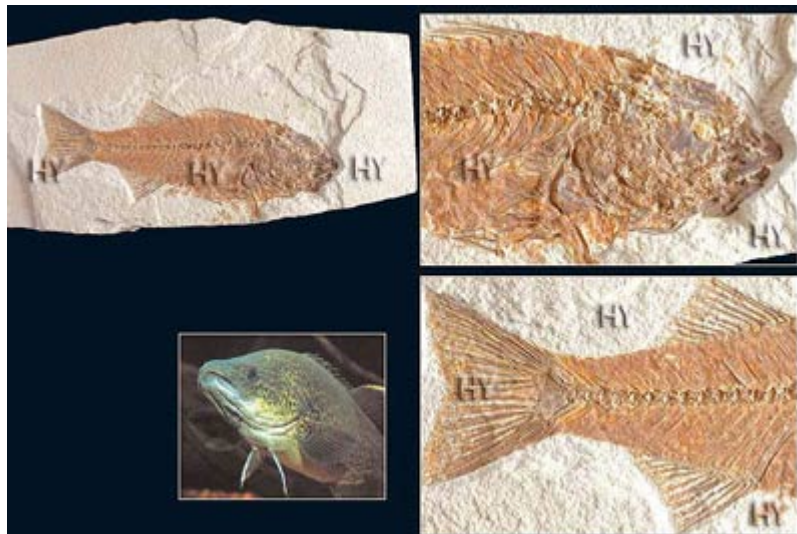

The rapid effluxion of time is a portent of the End Times.

PERCH

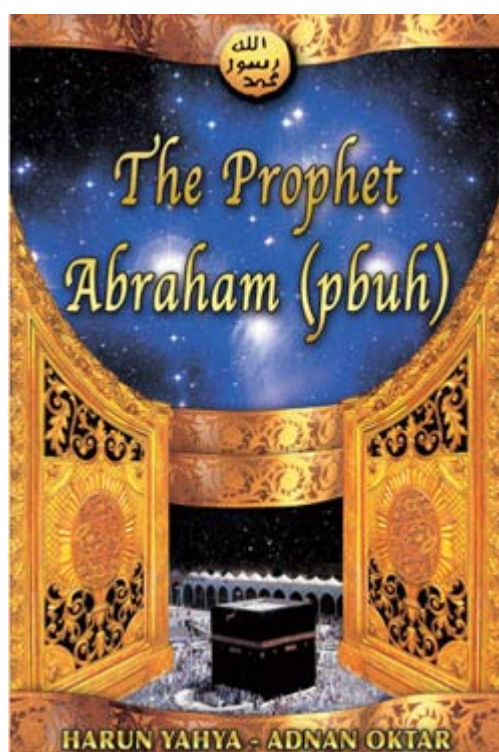

Age: 54 to 37 million years old
Size: 30.4 centimeters (12 in)
Location: Kemmerer, Wyoming
Formation: Green River Formation
Period: Eocene

Perches are a kind of fish that can adapt to different environments and water temperatures.

Darwinists' claim that living species evolved from one another via gradual changes is once again refuted by perch fossils. Today's living perches share the same structures as their counterparts of 50 million years ago.

[The Prophet Abraham \(pbuh\)](#)

Each prophet possesses virtues that are praised in the Qur'an. Therefore, believers must carefully study every detail of these Qur'anic accounts so that they can take their lives, moral virtues, and deep devotion to Allah as models for themselves. Each prophet was sent to his own tribe, experienced different situations, and used various methods to explain Allah's existence. For that reason, the natures of the prophets' tribes, and their reactions to the prophets, as well as the difficulties experienced by those who became believers and the prophets themselves, provide us with important information about how we can please Allah.

This book introduces the Prophet Abraham (pbuh), who is praised in the Qur'an in these terms: **"You have an excellent example in Abraham and those with him"** (Surat al-Mumtahana: 4) so that he can serve as role model for our own lives. Since every piece of information about the Prophet Abraham (pbuh) contains considerable wisdom, we shall examine his life closely in this book so that we can follow his example.

[The Prophet Jesus \(pbuh\)](#)

In the Qur'an and the hadith of our Prophet (saas) there are important signs regarding the Prophet Jesus' (pbuh) ascending to Allah's Sight and his second coming to the earth. The descent of this holy prophet is a miraculous incident that will have impact on the entire world. When this prophet having extraordinary attributes will come to the world again, he will join Muslims and Christians in the actual morality of religion and make the morality of religion dominant over the world. With the spread of the morality of religion, peace and security will dominate the world and people will attain a world that they have been longing for. For this reason all people who have genuine faith must at once get into action to get prepared for this blessed incident and make an all-out effort to meet this holy person in the best manner.

In this site you can find information regarding the birth of the Prophet Jesus (pbuh), his life, the miraculous aspects of his ascent to Allah's Sight, the moral perfection of this holy servant of Allah whom He supported with great miracles, and the miracles he displayed to people during the time he stayed in this world. This site will also provide you information about evidence regarding his second coming to earth from the Qur'an and the hadith, information in the Torah and Gospel regarding his return to earth and quotations from Bediuzzaman Said Nursi about this subject.
