

# **“We will never, ever allow the communists to divide our country”**

**There are some people who foolishly do not like our Southeastern brothers. They do not want them to come to Istanbul, or even to see them where they live; they do not want them to live well and prosperously. “Let the country be split up, just so long as they go away,” they say.** There is a war of nerves at the moment. Some commentators are on the wrong side in this war of nerves.

**Let me say that we will never allow our Southeastern dear ones to be split away from us. We will never, ever allow the communists to divide our country.** Our citizens in the Southeast are very dear to us. **They are Turkey’s adornment. With their customs and traditions, they add color to Turkey.”**

Let me say that nothing will come from talking to Abdullah Öcalan. The real issue is partition. **The nation will never permit partition.**

**I know what our government and MIT are doing. We know that MIT and Prime Minister Tayyip Erdoğan will not fall for this. The government is doing a good job and it will not fall for such things. It will neither hand the Southeast over, nor fall for such ruses.**

Some people stand up and say, “Let us hold a referendum and ask the public whether or not they want partition.” How can anyone ask that? **Think of a family. Would you go to the father and say, “Do you want to leave your family?” How can you ask that?** They must stop saying these things.

Some people say, “Let’s get them to lay down their arms.” That is very misleading. **You may get them to lay down their arms, but they will just get a better weapon two days later.** That logic is very wrong. **The weapons are in their heads. If someone has the mind of a killer, he will always find a weapon. We must get them to lay down the weapons in their minds; the Darwinism and the communist killer mindset.**

What is really needed is an intellectual campaign in the Southeast. Guns and bombs have produced no solution for 30 years. A scientific struggle is needed. Darwinism, the bedrock of communism, needs to be intellectually eliminated. That intellectual campaign needs to be carried out by treating people with love and affection. **(Adnan Oktar, January 6<sup>th</sup>, 2013, A9 TV)**
