

HIDDEN MIRACLES OF THE END TIMES OF OUR PROPHET: NO. 3 The appearance of the Comet Lulin

We are witnessing hundreds of miracles of our Prophet (saas) in this century: One such miracle is the passage of the comet Lulin. Our Prophet (saas) provided numerous details about this comet that could not possibly have been known with the level of science as it was 1,400 years ago and all those details came true, word for word. This is an important miracle.

However, some Islamic scholars never discuss the miracles of our Prophet (saas), and even deliberately conceal them. These people need to reflect on how they will account for having concealed these evident miracles of our Prophet (saas) in the hereafter.

You are about to witness one of these miracles!

“When Abbasi Malik arrives at Khorasan, one of the signs of the coming of the promised Mahdi, A DOUBLE-TOOTHED LIGHT SHEDDING HORN WILL APPEAR IN THE EAST.” (Imam Rabbani, Mektubat-i Rabbani, 381. Letter, p. 1184)

The reference to a “double-toothed, light shedding” horn indicates the comet Lulin, which passes closest to the Earth on February 24th, 2009; the year 1430 according to Islamic calendar.

Our Prophet (saas) also miraculously described all the other features of this comet:

But some people are trying to keep these miracles of his hidden

(1) ... double-toothed...: ...That column has two heads on its top part. IT IS DOUBLE-TOOTHED. There is a short cavity between the two.

The fact that the tail of the comet Lulin is forked completely matches the term *double-toothed* in the hadith.

(2) ... light-shedding...: A DOUBLE-TOOTHED LIGHT SHEDDING HORN WILL APPEAR IN THE EAST

The term *light-shedding* in the hadith refers to the brightness of the comet Lulin, which exceeded that of six stars as it approached the Earth.

(3) ... a horn...: That whiteness appearing in the east was first in the form of a pillar. THEN IT TOOK THE FORM OF A HORN.

The main distinguishing feature between Lulin and other comets is that as well as the comet having a tail at the back, it also has a tail in the front. Examination of photographs of Lulin and its two tails immediately reminded one of a horn.

(4) The course of the constant is from west to east...:

This refers to the movement of heavenly bodies. Indeed, all heavenly bodies travel **from west to east.**

(5) Its daily passage, on the other hand, is from east to west. ...:

Here the expression "**Its daily passage, on the other hand, ...**" indicates that the comet Lulin, as opposed to all other heavenly bodies, travels from east to west.

This feature, which has never been seen before in any other celestial body, and this having been foretold by our Prophet (saas) some 1,400 years ago as a portent of the coming of Hazrat Mahdi (pbuh), is definitely a very great miracle.

Now, note this.

Another highly significant feature of this comet is that scientists say that it will next pass by the Earth **after at least another 1,000 years.** Yet this is not going to be possible because the hadiths and Sunni scholars say that the life span of the Ummah of Islam after our Prophet (saas) will be between Hijri 1400 and 1500. In other words, the life of the Ummah of Islam will have come to an end by Hijri 1500. (God alone knows the truth)

THE LIFE OF THE UMMAH WILL PASS 1,000 YEARS YET NOT EXCEED 1,500 YEARS.... (*Muhammad ibn `Abd ar-Rasul Barzanji, Al-Isha`ah li Ashrat as-Sa`ah, p. 299*) (*Transmitted by Jalaluddin As-Suyuti's Al-Kashf `an Mujawizat Hadhihi al-Ummah al-Alf, 'Al-Hawi lil-Fatawi'*)

It is therefore impossible, according to completely trustworthy hadiths and the shared opinions of Sunni scholars, for the comet Lulin to pass by the Earth in 1,000 years' time.

Note that they are concealing the miracles of Rasulullah (saas).

Intense rainfall seen after the comet Lulin is another portent of the appearance of Hazrat Mahdi (pbuh).

At Hazrat Mahdi's (pbuh) coming, a double-tailed comet will appear and will be so bright that it will shine like the full moon. **After the appearance of this comet there will be such rain that great damage will be caused. But people will welcome that rain because no rain will have fallen for the previous three years.** (Murthadha Lakha, R and K Tyrell Publishers, London, 1993)

There will be a drought before the passage of the comet Lulin, and then rain will fall after it has passed by. Just as described in the hadith, there was a severe drought in

the three years before the coming of the comet Lulin in 2009. Immediately after 2009, intense rains were seen in numerous provinces of Turkey, and considerable damage was caused in many.

Events foretold 1,400 years ago happening just as they were described is a miracle bestowed on our Prophet (saas) by God. The fact that these miracles are occurring is evidence that we are in the time of the Mahdi (pbuh). Muslims must rejoice when they see these miracles, and share that delight with other people.

One hadith reveals that:

“The Dajjal will not appear until the people become negligent in talking about him, and until the Imams abandon talking about him on the Minbars (in their Khutba).” (Narrated in Majma Al-Zawaid)

So the absence of discussion of the portents of the End Times will be yet another portent of the coming of Hazrat Mahdi (pbuh). The way that the scholars in question have ceased discussing the systems of the dajjal and the Mahdi and Jesus the Messiah, and that the way they are covering up the miracles of our Prophet (saas), shows that the Mahdi is already here.
