

Extracted From The Evolution Deceit By Harun Yahya

The magazine, published every four months, also carried Harun Yahya's "The Fallacy of Evolution." Here is the introductory passage to the article written by the editor of the magazine:

"Allah Ta'ala created the first human being, Hazrath Adam (A.S.), from sand. This was the beginning of human species. The Qur'an has declared this in several places. However, western scientists are still at pains to try and prove that their forefather was an ape. In their quest to fool others into believing the fallacy of evolution, they resort to the most deceptive means."
