

FOX SKULL

Darwinists have no scientific evidence that evolution ever happened. This lack of evidence is apparent in their works and papers. The evolutionist and paleontologist Collin Patterson reveals the dilemma facing evolutionists with his response to criticism that he failed to include intermediate forms in his book *Evolution*: I fully agree with your comments on the lack of direct illustration of evolutionary transitions in my book. If I knew of any, fossil or living, I would certainly have included them. . . .I will lay it on the line, There is not one such fossil for which one might make a watertight argument. (L.D.Sunderland, Darwin's Enigma: Fossils and Other Problems, 4th Edition, Master Books.)
